

TEACHER LED INNOVATION PROJECT

Professional development session No1.

The first connection with the project team. An opportunity to reintroduce, reiterate and provide real ideas about how to integrate technology in the classroom.

Ideas -

- Set teachers up with a 'Pearltree' account so they can track the students from the group they teach.
- Have them comment on their students sites immediately.
- Assist them as they begin creating their own online presence.
- Brainstorming session - use the 'Student Voice' document as a starting point. What could you add to their "ways technology could help us' column?
