📄 ECOMGPT Full Market research EXPANDED

This is what the funnel will look like

Analysis below

1. Who are we talking to?

- We're talking to Ryan, an ambitious entrepreneur around 25, mostly men, dealing with money challenges and looking for opportunities in AI and e-commerce. They earn between $0 to $1000 monthly and want a breakthrough in their finances.

2. Where are they now?

Emotionally, they find themselves in a state of frustration and anxiety, yearning for a path to financial success. Mentally, confusion clouds their understanding of how to effectively leverage AI for income, and they face the daily struggles of self-blame for past mistakes. Their challenges include the fear of missing out on potential opportunities and a limited comprehension of AI's true potential.

3. What action do I want them to take by the end of the sales page?

- A: The desired action is for them to enroll in the EcomGPT course.
- B: They could either hop then on a free discovery call to talk more about their current state and close them high ticket

Why B? My guy Matt often tells me how stupid the readers how because they don't get how building an e-commerce store and ready-built e-commerce store is a service, so just in case this happens again, free discovery call could be a smart move

4.   What are the steps they need to experience?

- We start by understanding their frustrations and telling relatable stories and the new method to share. Then, we introduce the EcomGPT course, highlighting how it can transform their situation. Urgency kicks in with a limited- spot left with 80% guidance from Matt and proof from testimonials. Follow-up emails keep them engaged, providing more info and success stories to keep things urgent and encouraging them to take that important step.

strongest analysis: I don't know if I'm correct but would a course sales page be better with a free discovery call to pitch them rather than a 97$ per month course mentorship?

I know there are benefits of a discovery call they would get from a sales letter page and one of them is building trust and credibility.

If a discovery call would make sense if you are teaching students how to utilize what you are offering in the course sales letter page, rather than a monthly payment?

the funnel type that I'm using for my client is a lead funnel, where they get a free course in exchange for their emails, and then they get directed to the sales page.

My best plan of action is to A/B test this pricing/closing strategy to get them to buy the course/mentorship.

I think this is a smart move because it wouldn't make sense to buy another course from a free course to a paid one so doing a free discovery call instead of 97 monthly payment and closing them high ticket.

A: Earn Your First $1,000 With The Same 'AI Ecom Agent' Method That I Used To Start A Brand New Online Business

B: How To Become An AI "Ecom Agent" And Earn Your First $1,000 or more

In the past 2 years, I grew my monthly income by 1,500%, generating $252,547 by becoming an AI 'Ecom Agent'

Body copy below:

Dear friend,

If you want to generate a consistent income of $1,000 or more, then this is the most important letter you'll ever read.

Because 2 years ago, I made a discovery that allowed me to go from ZERO to six figures per year with this simple AI 'Ecom Agent' method.

And over the next few minutes, I'm going to show you how you can use this method and make your first money online just like my guy named Michael

Here's How It Went Down

This is Matt, and 2 years ago, I was dead **broke.**

I tried to find multiple ways of getting rich. I tried **dropshipping, SMMA, and trading**, and lost a
bunch of money doing those **"side hustles"** or whatever you call it.

The truth is, these **"side hustles"** are way too **saturated.**

Then, someone offered me to make him a Shopify website for a hundred dollars,

I wouldn't say no to that, I mean who wouldn't?

But there's a catch.

I tried to make websites myself, but the thing is that they were ugly

I knew deep in myself that they wouldn't work

Then, one day, I came up with a "crazy Idea".

So instead of making these websites manually, I decided to leverage the power of AI

At first, everyone thought I was a fool, they believed that there was no way AI could handle
such a complex task...

(One of my old friends dismissed my idea as mere *daydreaming*)

But I wasn't discouraged.

At that point, I had nothing to lose and everything to gain.

So, after relentless trial and error, late nights, and early mornings

I finally discovered what I now call the AI 'Ecom Agent'

Where you can simply automate almost everything by combining ecom and AI.
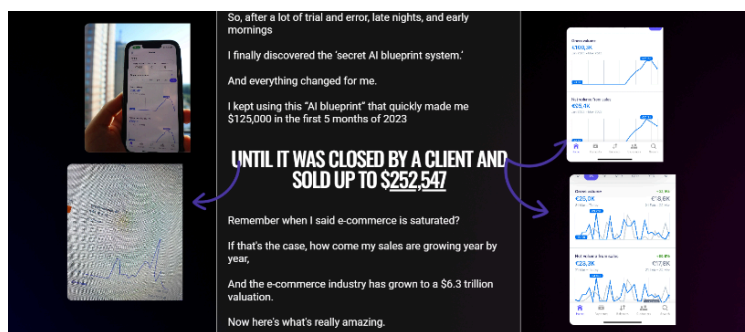

Product research, creating high-converting Shopify stores, content creation.

And any other aspect you can think of.

Then everything changed for me.

I kept using this AI "Ecom Agent" method…

UNTIL IT WAS CLOSED BY A CLIENT AND SOLD UP TO $252,547

Remember when I said e-commerce is **saturated?**

Yes, the e-commerce industry is saturated, because the internet is messed with so-called "ecom gurus".

Who sells you nothing but empty promises.

Now here's what's really amazing.

Even though becoming an AI '**Ecom Agent'** is fairly simple…

We've proven its effectiveness across 400+ high-paying clients, delivering valuable results.

While e-commerce may seem saturated because of all these gurus,

The fact remains that **you and I have an incredible advantage because…**

Hardly Anyone Is Using It!

And the reason why is simple:

I've never publicly shared it.

...Until today.

Hold on, it gets better from here...

Now I realize how powerful this AI Ecom Agent method is,
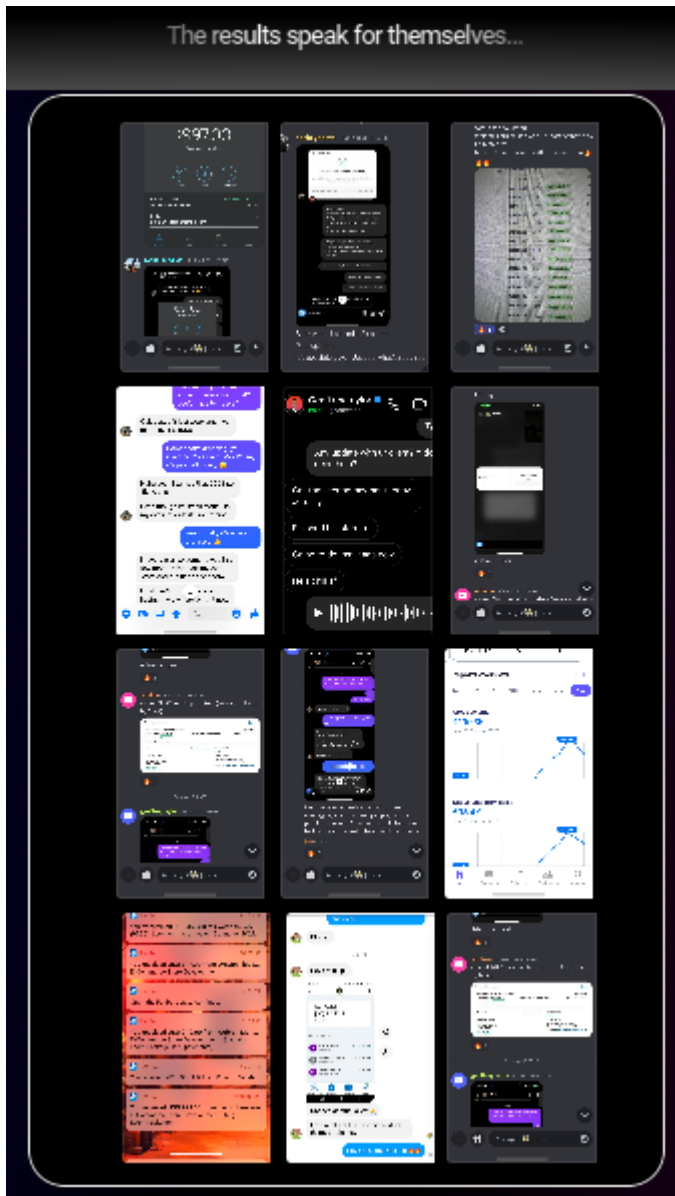

Then that's when...

I decided to push the limits...

I showed this method to my friend Michael...

He made $4k within 3 months.

I started teaching this to other students and well...

The results speak for themselves.
