Abstract

Crafted concisely in English within a single paragraph spanning 150-250 words on one line spacing, the document encapsulates the background, research objectives, method, results and discussion, and academic contribution.

Keywords

Written in English 3-5 words or groups of words, written alphabetically. The keywords separated by semicolon (;), crucial to the appropriate indexing of the papers, are to be given.

Introduction

Providing an exposition of the contextual backdrop, identifying pertinent issues, highlighting the significance of the research endeavor, and presenting a research theory. This segment culminates with a delineation of the research objectives. It is imperative to maintain equilibrium between the theoretical underpinnings and practical applications inherent to the subject matter.

Arabic writing or quoting verses from the Qur'an or hadith refers to the following form:

أَجَلٌ لَكُمْ لَيْلَةَ الصَّيَّامِ الرَّفَتْ إِلَى نِسَائِكُمْ هُنَّ لِبَاسٌ لَكُمْ وَأَنْتُمْ لِبَاسٌ لَهُنَّ ۚ عَلِمَ اللَّهُ أَنَّكُمْ كُنْتُمْ تَخْتَانُونَ أَنْفُسَكُمْ فَتَابَ عَلَيْكُمْ وَعَفَا عَنْكُمْ ۖ فَالْآنَ بَاشِرُوا هُنَّ وَأَنْتُمْ مَا كَتَبَ اللَّهُ لَكُمْ

Method

Ensure that the provided details enable replicability of the work, encompassing clear presentation of technical information pertinent to the study. This facilitates readers in conducting research based on the elucidated techniques. Inclusion of specifications for materials and equipment is imperative. Additionally, elucidate the approaches or methodologies employed in the study alongside the data analysis methods utilized.

Literature Review

Critical analysis and synthesis of existing research on a particular topic. It provides an overview of the current state of knowledge, identifies gaps, and highlights key findings in the literature published no later than the last 5 years (Lukito, 2017). The purpose of a literature review is to situate your own

research within the context of existing scholarship, demonstrating your understanding of the topic and showing how your work contributes to the ongoing conversation in the field (Abdullah, 2023). Learning how to write a literature review is a critical tool for successful research (Auda, 2021). Your ability to summarize and synthesize prior research pertaining to a certain topic demonstrates your grasp on the topic of study and assists in the learning process. A comparison of this study and previous studies is necessary to demonstrate the novelty of the present study.

Result

This section should prominently feature well-prepared tables and/or figures, as they serve to communicate the primary observations to readers effectively. Any information conveyed through tables and figures need not be reiterated in the text; rather, the text should emphasize the significance of the principal findings of the study. Typically, journal papers will incorporate three to seven figures and tables. Duplication of data in both tables and figures is to be avoided. The study results are deliberated upon to address the formulated problem, objectives, and research hypotheses.

Then, if the data translation requires a table or chart, it can be included in this sub-discussion with an example as follows:

Table Titles

Table 1. Formatting Rules:← 10pt, Century751 No2 BT Roman

Object	Font	Alignment	Space above	Space below
Title	14pt bold	Centered	0pt	10pt
Author(s)	12pt bold	Centered	10pt	10pt
Addresses	9pt italics	Centered	0pt	0pt
Heading1	12pt bold	Left	12pt	6pt
Heading2	12pt bold	Left	12pt	6pt
Heading3	12pt bold	Left	12pt	6pt
Body	11pt	Justified	0pt	0pt
Bullet	11pt	Justified	0pt	0pt
Table title	11pt	Centered	10pt	6pt
Figure title	11pt	Centered	3pt	6pt

Source.

Discussion

It is highly recommended that the discussion centers on the rationales, methodologies, and potential implications of the research findings, while also considering their applicability to related issues. Elucidate the contributions of your research to the advancement of science.

Conclusion

The conclusion should be drawn from the research findings, formulated concerns, and research objectives. It should be articulated in a single

paragraph devoid of numerical expressions. Elaborate on the contributions of your research to the field of science.

Acknowledgement

All individuals who have contributed to the work but are not listed as authors should be acknowledged, with their specific contributions delineated. Additionally, all sources of funding for the research must be acknowledged, specifying both the funding agency and the grant number, if applicable, for each funding source.

References

Manuscripts are composed employing established citation management software such as Mendeley, Endnote, or Zotero, and choose American Psychological Association (APA) style 7th edition. Approximately 80% of the references cited in literature reviews should derive from recent scholarly journals published within the past five years, with the remaining 20% drawn from research reports and/or articles with a minimum of 30 references, and add the doi/url of each referenced article.
