A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions. The Abstract should be 100 to 200 words in length. The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article (9 pt).

INTRODUCTION (Avenir Next LT Pro, bold, 12 pt)

The introduction should explain the background and context of the research problem and demonstrate its relevance to the fields of electrical engineering and informatics. Authors are expected to present a critical overview of recent and relevant studies to establish the current state of the art. The introduction must clearly identify the research gap that has not been adequately addressed in previous works and explicitly state the novelty of the present study. The section should conclude with a clear statement of the research objectives and the scope of the work.

RESEARCH METHODS (Avenir Next LT Pro, bold, 12 pt)

The methods section should describe in detail how the research was conducted so that the study can be replicated by other researchers. This section should explain the research approach or design, materials, tools, datasets, systems, or software used, as well as the procedures or algorithms applied. Data collection techniques and data analysis methods, including statistical tests, performance metrics, or evaluation criteria, should be clearly

described. If equations are used, they must be written clearly and consistently, and all figures or tables must be properly referenced in the text.

RESULTS AND DISCUSSION (Avenir Next LT Pro, Uppercase, bold, 12 pt)

Result (Avenir Next LT Pro, Capitalize each word, bold, 11 pt)

Sub-sub title (Avenir Next LT Pro, Capitalize each word, bold, italic, 11 pt)

This section should present the research findings in a clear and logical manner, supported by appropriate tables, figures, or graphs. The results should be described concisely without unnecessary repetition of numerical data. The discussion should interpret the results critically, explain their significance, and relate them to the research objectives. Authors are encouraged to compare their findings with previous studies to highlight similarities, differences, and contributions. The implications of the results, as well as the strengths and limitations of the proposed method or system, should also be discussed.

Discussion (Avenir Next LT Pro, Capitalize each word, bold, 11 pt)

This section should present the research findings in a clear and logical manner, supported by appropriate tables, figures, or graphs. The results should be described concisely without unnecessary repetition of numerical data. The discussion should interpret the results critically, explain their significance, and relate them to the research objectives. Authors are encouraged to compare their findings with previous studies to highlight similarities, differences, and contributions. The implications of the results, as well as the strengths and limitations of the proposed method or system, should also be discussed.

Tables and Figures (Avenir Next LT Pro, bold, 9 pt)

Tables and figures are part of the manuscript. They cannot be separated from the body of the manuscript—place tables and figures where appropriate to the narrative so they complete the narrative. Tables and figures are numbered sequentially based on the order in which they appear in the text. Tables and figures must be given a title. The title of the table and figure follows these numbers. The table display can be seen in Table 1.

Table 1. Table Title

Data			

Images included in the manuscript must be of good quality. Images do not stand alone and must form a relevant part of the text. Please note that the images are not documentation unrelated to the discussion of the manuscript. Ensure the manuscript does not display images that show the identity or affiliation of the authors.

The printed version of the journal is printed in black and white. The author should adjust the image to suit these conditions. Examples of image placement and naming are shown in Figure 1.

CONCLUSION (Avenir Next LT Pro, bold, 12 pt)

The conclusion should summarize the main findings of the study and emphasize the contributions of the research to the field of electrical engineering and informatics. This section should directly address the research objectives and highlight the novelty of the work. Repetition of sentences from the abstract or discussion should be avoided. Where appropriate, authors may provide recommendations or directions for future research.

ACKNOWLEDGMENT (Optional, Avenir Next LT Pro, bold, 12 pt)

The acknowledgment section may be used to recognize funding agencies, institutions, or individuals who provided support for the research but are not listed as authors.

REFERENCES (Avenir Next LT Pro, bold, 12 pt)

To meet the quality standards of articles worthy of publication, editors require authors to use primary references (journals) with at least 80% of the total references in the Bibliography. In addition, authors are required to use the latest references published in the last 5-10 years. This article does not use footnotes in the text, and all reference sources must follow the rules for writing citations and Bibliography. The format of citations in the manuscript and display of the References uses the IEEE Style.

Citation in the text (in-text citation) must follow what is listed in the Bibliography. This quote is followed by or ends the sentence or phrase quoted from the source. In citing manuscripts, include the last name of the author followed by the year of publication of the cited article.
