

**Position:** Mechanical Overseer / Technician

**Number Required:** 2

**Required Experience:** 2 Years

**Location:** Site-Based (Hydropower Project)

### **Job Summary**

We are seeking a skilled Mechanical Overseer / Technician to support the operation and maintenance of mechanical systems at our hydropower project site. The candidate will ensure smooth plant operations by performing routine maintenance, monitoring equipment, and assisting in troubleshooting activities.

### **Key Responsibilities**

- Operate and maintain mechanical systems, including turbines, valves, penstocks, and auxiliary equipment
- Conduct routine inspections and preventive maintenance of mechanical equipment
- Identify mechanical faults and assist in corrective maintenance under guidance
- Ensure compliance with safety standards and site procedures
- Maintain daily operation logs, maintenance records, and reports
- Assist engineers during commissioning, testing, and shutdown activities

### **Qualifications & Experience**

- Diploma / Technical certification in Mechanical Engineering or related field
- Minimum 2 years of experience in operation and maintenance of hydropower plants

### **Skills & Competencies**

- Practical knowledge of hydropower mechanical systems
- Ability to work independently at project sites
- Strong troubleshooting and problem-solving skills
- Basic documentation and reporting skills
- High awareness of safety and operational discipline
