

Submission for 'MUSEVERSE: Music into the metaverse'

Milestone 8

Milestone 8 – SNET Service	
Status	😬 Not Started
Description	Back end servers infrastructure
Deliverables	
Budget	\$10,000 USD
Link URL	

Explanation

After a lot of work and configuration, we're pleased to announce that the ['Key Counter' service](#) has been deployed to the SingularityNET AI marketplace. We've set up the necessary backend server infrastructure (service hosted on runpod.ai and daemon on AWS) and now have the service fully functioning. We've demonstrated this using our example application in the following video.
