

Privacy Policy for Seller Spy for Etsy

Last updated: June 2026

1. Information We Collect

"Seller Spy for Etsy" respects your privacy. The extension itself runs locally on your browser. To verify premium subscriptions, we use Firebase Authentication, which securely collects and stores your email address and an encrypted password.

2. How We Use Your Information

The extension requests access to "etsy.com" strictly to analyze the HTML elements on the product pages you visit. This data is processed locally on your device to calculate profit margins and reveal hidden tags. We DO NOT upload, share, or track your Etsy browsing activity or any extracted Etsy data to our servers.

3. Storage and Data Retention

We use the Chrome local storage API to save your calculation preferences (like custom shipping costs). This data remains entirely on your computer and is never transmitted. Your authentication email is retained in our secure Firebase database only as long as you maintain an active account.

4. Security

Your data is protected. Authentication is handled entirely by Google Firebase's secure, encrypted servers. We do not maintain our own servers, nor do we have access to your passwords in plain text.

5. Third-Party Services

Our payments are securely processed by Lemon Squeezy. We do not collect, process, or have any access to your credit card or financial information. Lemon Squeezy handles all billing.

6. User Rights and Data Deletion

You have the right to request the complete deletion of your account and email address from our Firebase database at any time. To request data deletion, please contact us via the Chrome Web Store support tab.

7. Contact Us

If you have any questions about this Privacy Policy or wish to exercise your data rights, please contact the developer via the Chrome Web Store support tab.
