

The background of the entire image is a close-up photograph of several flowers. On the left and bottom, there are purple flowers with five petals and prominent yellow stamens. On the right, there are bright yellow flowers. The background is a solid black, which makes the colors of the flowers stand out. There are some light flares or starburst effects on the right side of the image.

LGBTQ2S+

The importance of centering the experiences, strengths and needs of people within our Lesbian, Gay, Bisexual, Trans, Queer/Questioning, Two Spirit (LGBTQ2S+) communities is important to us at CSVANW while we work to address the unique and multiple victimizations and structural oppressions faced by our LGBTQ2S+ relatives. It is critical to work towards inclusive advocacy.

LGBTQ2S+ survivors of violence experience the same rates of violence as other intimate partner relationships- however, LGBT survivors sometimes face discrimination (whether intentional or not) when seeking help and protection. These discriminations can re-victimized and/or re-traumatize an individual. Although VAWA 2013 prohibits such discrimination to ensure that all victims of violence have access to the same services and protection to overcome trauma and find safety.
