

Outreach Draft #3

Subject: Automation Potential

Hello[Owner Name],

I found your business while searching for [niche business] in the [location area]. I really like the way your website is set up in a way that makes the customer feel comfort.

I was emailing to ask you if you have ever considered using Ai to run your customer support system.

What it would do is make it so that you don't have to answer all of the messages you get from customers and the Ai would do it for you.

Would an automated customer support system save you time and increase customer satisfaction?

Kind Regards,

[My name]

Subject: Automate Your Customer Support to Save Time

Hi [Owner Name],

I came across your business while searching for [niche business] in [location area]

I wanted to ask if you've considered using AI to automate your customer support. By implementing an AI-powered system, you won't have to personally respond to every customer inquiry. The AI would handle routine messages, freeing up your time and enhancing customer satisfaction.

Would a solution like this be of any use to your business?

Best regards,

[My Name]
