

This statement was drawn up by members of the [Red Clinic](#) in preparation for our next public online meeting (date to be arranged), at which we would like members of different psychoanalytic organisations around the world to speak about the institutional obstacles and responses to the task of standing in solidarity with Gaza. Would you please sign, and be part of the process of putting together a speaker list for the meeting. Please be in contact with us about this, as individuals or as psychoanalytic organisations willing to sign, at redclinicenquiries@gmail.com

PSYCHOANALYSIS IN SOLIDARITY WITH GAZA

We are members of psychoanalytic organisations in solidarity with our colleagues in Gaza, standing with Palestine against the genocide currently being waged by the Israeli state. This current onslaught, which has already resulted to date in the death of more than ten thousand people in Gaza, and many murders by settlers of Palestinians in the West Bank, is being conducted with the support of regimes in the global north that care nothing for human life. The Israeli state and those who deliberately abet it care

nothing for those they portray as sub-human, and whom they tolerate, at best, as powerless victims.

We are also aware of instances of clinical practitioners inside the Israeli state siding with that state and causing obstructions in the contracted supervision of Arab psychotherapists, with consequent effects on already traumatised Arab patients. This is unconscionable complicity in oppression, a betrayal of the ethics of psychoanalytic practice. This context, as many international organisations and local Israeli organisations have declared for many years, is apartheid. Still worse are the proclamations of psychoanalysts inside and outside Israel that instrumentalise the 7 October attacks in order to support the ongoing invasion of Gaza.

Critical support does not preclude unconditional support for a people dispossessed of their land for 75 years (nor condemnation of the Hamas attacks). Ambivalence about organisations and slogans engaging in resistance does not warrant hypocritical 'neutrality' over the rights of the Palestinian people. Our task is to resist the ideological and state offensive carried out against the Palestinians. We call on our colleagues to dissociate themselves from the war on Gaza, and to state unequivocally that they will speak and act for Palestine. This is no time to be silent. Yes to resistance.

In personal capacity, and with a commitment to argue with colleagues to win organisational support for this statement:
