

Party in Equestria

<http://partyinequestria.tumblr.com>

Party in Equestria is a rhythm game based on DDR (Dance Dance Revolution) in which it will be possible to play with the keyboard as well as dance pads. The game will be mainly created with fan musics and officials. Currently, we're only two on this project (Solarwind for the stepcharts and Recorder Brony for the code) and we have worked mainly on stepcharts rather than code and graphics side of things because we have nobody to care of it. We therefore seek someone who could take care of the game sprites and banners as well as background pics for each songs. At the begin, it'll mostly look like a theme for Stepmania but we look to see if we could also add mods and a story mode, for the exemple, in the future.

Here is some of the few things we've already done:
