

A very simple explication with screenshots

Here's Nintenart

It seems she doesn't reply in dms, ~~confirming that her comms are fake possibly~~ (update: she does commissions for real, don't give money to her)

Aujourd'hui

Hello 🙋 I wonder how you create your 3D. I'm curious because I find it impressive

15:54 ✓

Are you trying to avoid me because my first message is too offensant ? I didn't ask for a comm or opening a patreon or anything. People in the earth know you are doing: making a 3D art takes HOURS and you cheat with Ai generator like Gemini

17:42 ✓

Like I said, **making a 3D art on blender or on source filmmaker takes hours**. But she is using an AI generator named Nano Banana Pro with Gemini 3 instead. It's easy to be trapped by its arts generated from that (below is an example from Luigi53)

NintenArt @nintenart3D · 24 nov.

Concept art of Cat Peach in super Mario 3D world for Nintendo Wii U but I made into a 3D render. So cute princess

This person uses Nano Banana Pro with Google Gemini. Here is something I was able to generate with it.

She is able to take others images from artists like Victor and she even deletes then reposts her nsfw image of Pauline

My art is being stolen and fed to AI

As everyone already knew, this account is not a 3D artist at all, when you brighten one of their latest posts, my actual renders are right behind it

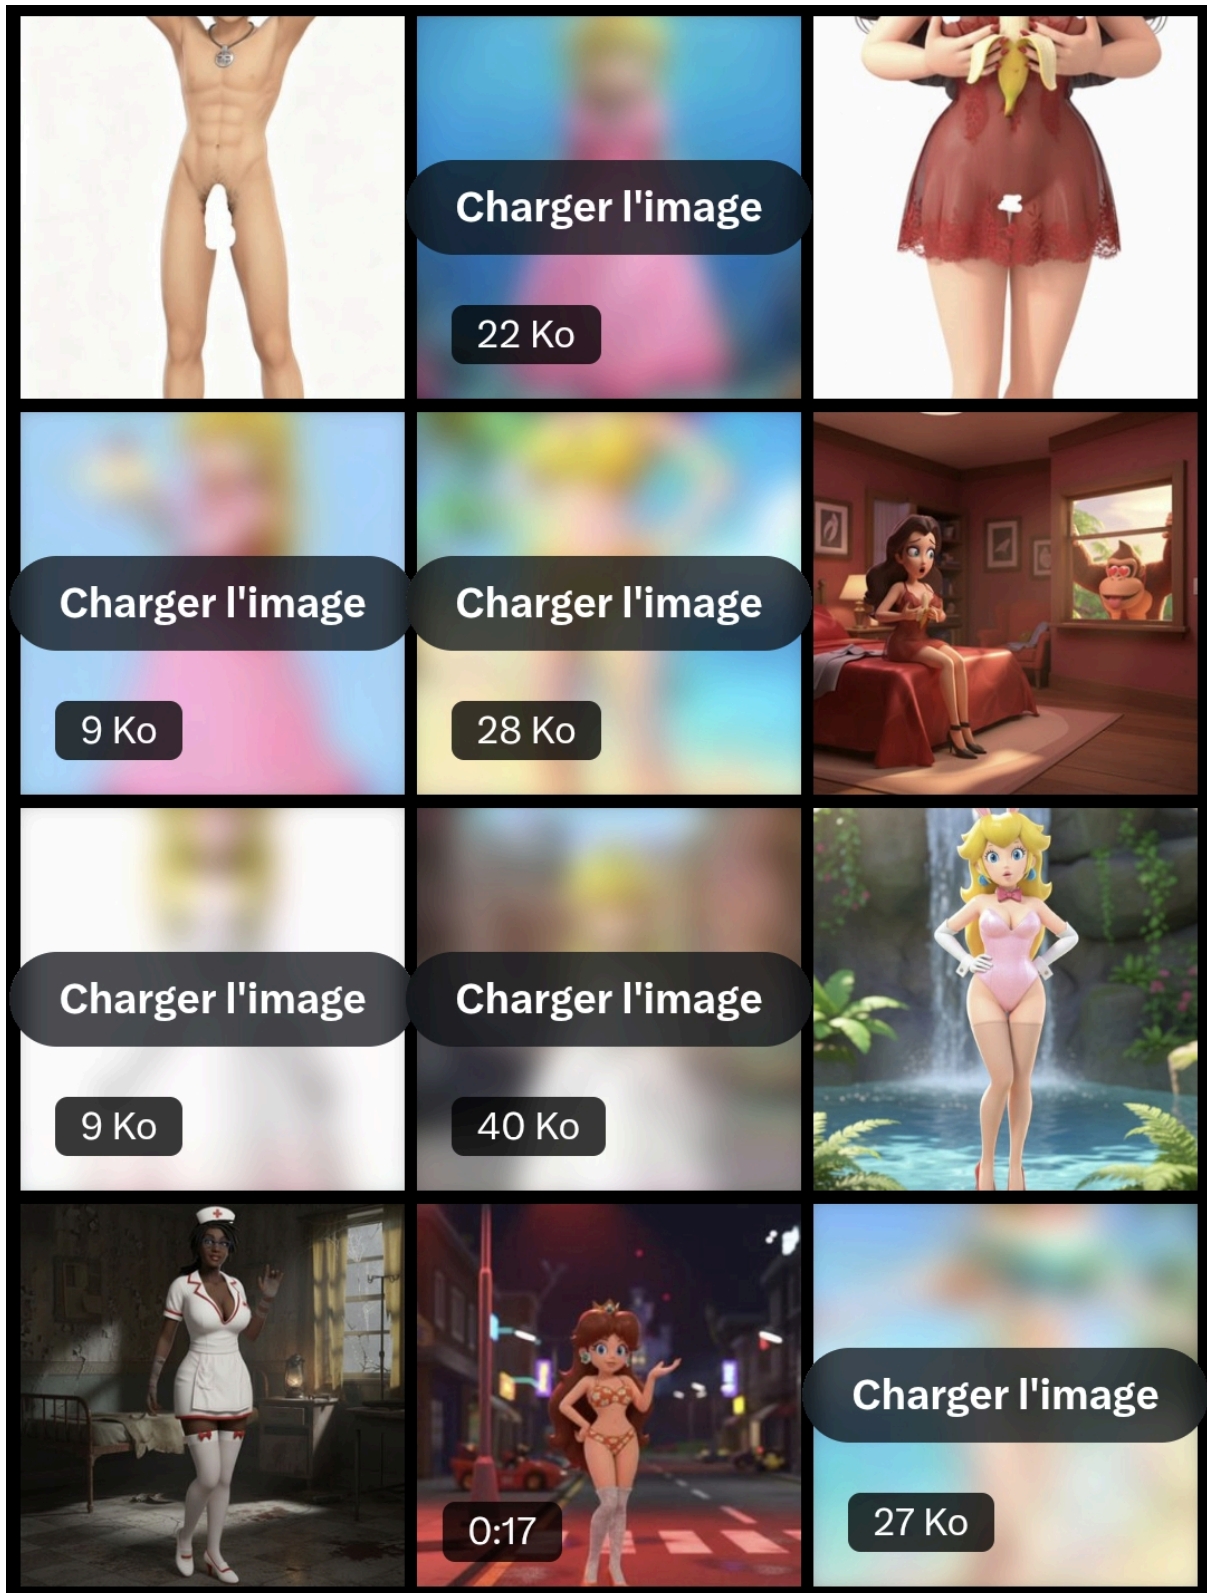

PLEASE don't support or engage with art thieves like them

Her profile bio doesn't prevent the nsfw content on her profile. **Any minors can see this type of content.**

Rosalina fans easy fall in love with that art below even it's AI... 🥹

Someone asked me to make princess rosalina in the bikini so here she is at the super Mario beach!

Nintenart is a mytho in the beginning then post possible “gooning bait”. She search farms while posting her fake 3D arts

- **She proclaims to be a 3D render artist but is cheating with AI**
- **She makes gooning bait posts thanks to the AI generator to get likes and retweets.**
- **She steals other people's art**
- **She didn't mark a nsfw warning to prevent minors from her nsfw content**
- **She doesn't reply to anyone in dms**

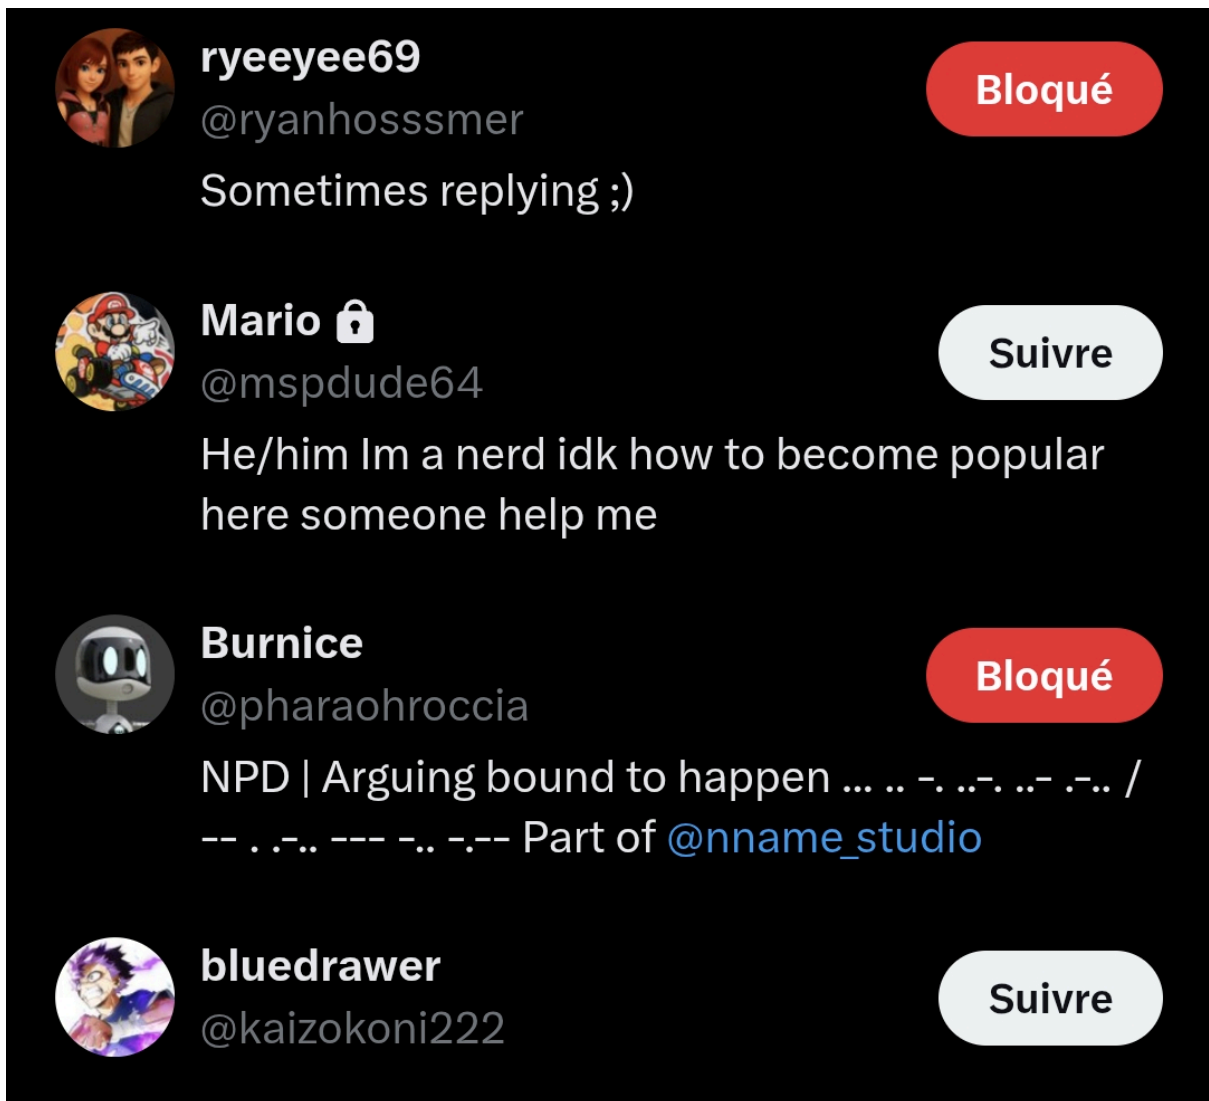

In addition of Twitter/X, **she has an instagram and patreon account too**

I demand to **stop interacting with her**, and **don't give her attention while retweeting**. **Block them**, it's very simple to understand !

She cracked to saying she is a true AI user minutes later after the creation of her account. After reporting many times and sending an email, I confirm that Twitter doesn't want to ban her sadly...

People from Nintendo would be insane to see her fake art because it imitates official renders too faithfully, it breaks USA's DMCA law.

It seems these idiots support Nintenart and their AI generated from stolen pictures. Nintenart followed them back. I recommend to block them if necessary

All credits of the posts are cited in those screenshots. If you want to be anonymous, my dms are open or post just a comment

Update: I just tested Gemini out of curiosity and it seems it doesn't allow nudity and instead of that when I prompt "without clothes" or "nudity", Gemini is able to censor the image I proposed
