

# Character Sheet<sup>1</sup>

| Basic Info                       |                                                        |
|----------------------------------|--------------------------------------------------------|
| Name:                            | Reference Photo Or Physical Descriptors <sup>2</sup> : |
| Age/Birthday/Time Shenanigans:   |                                                        |
| Brief Personality <sup>3</sup> : |                                                        |

| Motivational Framework             |                                    |
|------------------------------------|------------------------------------|
| Primary Motivations/Goals:         | Secondary Motivations/Goals:       |
| Internal Virtues to Achieve Goals: | Internal Flaws Blocking Goals:     |
| External Help to Achieve Goals:    | External Obstacles Blocking Goals: |

| Relationships <sup>4</sup> |                           |       |
|----------------------------|---------------------------|-------|
| Name                       | Relationship to Character | Notes |
|                            |                           |       |

<sup>1</sup> Tell me what you think at <https://archiveofourown.org/works/45621085> or at Jal's Fics Server <https://discord.gg/zR8HRKz>.

<sup>2</sup> Some writers like to do this up-front, but I challenge you to avoid crafting a "look" until you actually need it for your story. Fill in this box as you write, referencing or adding to it every time you use a physical descriptor.

<sup>3</sup> Recommend 1 sentence max. For example, if I was filling this out for Severus Snape, I might say "brilliant master of potions and dark arts, with snarky wit and no patience for dunderheads"

<sup>4</sup> In a desktop browser, put your cursor in the last cell of the last row and press "tab" to add a row. You can also right-click any cell and find the items in the context menu to add a row above or below the current row. In the mobile GDocs app, tap any cell in the table, and the icons at the bottom of the app should now include options to add a row above or below your current row.
