

Use this tool to 100x your money

Meta is a great tool that can make you easy money. If you've ever wanted a money printing machine, this is the closest you'll get. Money is always moving on Meta. You just have to find a way to get in the way. There's unlimited opportunity, if you avoid the mistakes other business owners make.

Untapped goldmine

The biggest problem people run into when using Meta, is that it's extremely complicated. It's like trying to diffuse a bomb, except you have to do it 50 times. There's so many options to choose from.

The funny thing is, it gets more and more complicated as you go. The further you get, the more buttons you have to press. It's like a video game, the further you get, the harder the levels become.

The good thing is that most people won't take the time to figure it out, which means it's an untapped goldmine. If you figure it out, you'll be able to make a lot of money. You'll get all the attention you could possibly need.

It takes time to learn it, but it's very worth it. If you don't want to learn it, you can always go to somebody who already knows how to use it. Get in contact with us gavin@gbabmarketing.com

Either way, you'll make money hand over fist. You just have to avoid the trap that many people fall into.

You're getting scammed

Meta makes around 100 billion per year. Yes you heard that right. I'm no Sherlock Holmes, but that means they have some pretty clever people working there.

They know that most people won't learn the real Meta tool, so they give you a shortcut, knowing most people will take it. Us humans love shortcuts.

The problem with the shortcut is that it's a money grab. They know most people don't have time to learn Meta, so they give you the boost post option. It's an easy way to take money from business owners. It's like taking candy from a baby.

Most business owners have no idea they're wasting money.

Boosting posts handicaps your results severely.

You can't target people who are most likely to buy from you. You can't change the headline, description, or the photos. They'll make you pay again if you want to do these things.

It's a lesser version of the real Meta tool. It's like the beta. You aren't getting the finished product.

You end up paying more for less results. You're basically setting money on fire, like the Joker from The Dark Knight.

Avoid this at all costs. It requires some learning. It will take some time, unless you hire somebody who already knows how to use it, like us.

The best marketing tool on the planet

Instead of using the boost post option, like everyone else, you need to take full advantage of the real Meta tool. There's so many benefits to using it. You'll get the results you're looking for.

You're looking for sales, not brand awareness. Boosting posts is for brand awareness.

Remember how I said you can't change anything on a post when you boost it? That's completely different with the actual Meta tool. You can change everything. You have the freedom to test things against each other.

You can also target people you want to target. Over time Meta will optimize results and do it for you.

You also get to control how much you spend daily, weekly, and monthly. You're not getting screwed out of your money.

You'll get way better results using it. You really can 100x your money, if you become good with it.

Marketing is one of the highest ROI investments in the world if you do it right. To do it right, you need to be using Meta.

Using the boost, is like being a normal guy against a roided up Lance Armstrong in the Tour De France. Lance is going to lap his ass. It's an uneven playing field.

Instead be like Lance Armstrong. You don't have to take steroids, you just have to use Meta. There's no needles required. Just the right platform.

Either start learning Meta today, or click the link below and fill out the form and we'll be in touch.
