LEARNING ACTIVITY SHEET
Empowerment Technology-SENIOR HIGH SCHOOL
Second Quarter, Week 2

Name of Learner: _____ Date: _____

Section: _____ Grade Level _____

ICT project that advocates for a specific Social Change or Cause

Background Information for Learners

ICT plays a very big role in society and for the individual as well; it helps us in terms of education, business, and our way of living. With the help of ICT, convenience, knowledge, and interaction will be easily attained. With the use of Information Communication Technology, we do not need to prolong the agony of waiting.

Media plays a very vital role and influences virtually every aspect of our lives. It is considered the best source to know about the happenings of the world. It dramatically affects our lives because media has the power to influence our thoughts. This influence is sometimes positive and sometimes negative.

ICT can enable disadvantaged individuals and communities to participate in the national and global policy decisions that can change their lives and empower them to take actions that can financially, socially, and politically benefit them.

In ICT Project maintenance it allows the user to create sets of questions and gather feedback using google forms. It could be used for all, the purpose of this is to gather feedback it can also be used for surveys, feedback, online registrations, and customer care support.

In this time of the pandemic, the use of technology is very useful, especially in education. In a traditional way of learning, the students will go to school and the teachers are going to check their attendance one by one. On another way around, the employee will enter the Companies, the biometrics will record the attendance of the employee. In new normal, technology will take place in everything, the Department of Education is the most affected institution. That's why the Department of Education gives different learning modalities where the students and parents can choose the way of learning of the students. The new normal was created a Google classroom where in this classroom is a free web-based platform that integrates your G Suite for Education account with all your G Suite services, including Google Docs, Gmail, and Google Calendar. Classroom saves time and paper and makes it easy to create classes, distribute assignments, communicate, and stay organized. This was used by the entire public schools, where they want to track student performance, attendance, and others thru google forms also Companies want to learn about their customers thru tracking even online selling thru social media like Facebook and others.

Social Media is one of the tools where the teachers can reach the learner's intention, with the help of these we can give the lesson to the learners immediately.

Learning Competency

analyze how target or intended users and audiences are expected to respond to the proposed ICT Project for Social Change on the basis of content, value, and user experience. CS_ICT11/12-ICTPT-IImp17

Activities

Activity 1 : Application

Messenger is one of the examples of ways to reach learners. Follow the steps on how to create a Poll or Survey that the use of messenger. **Send your output to your Subject Teacher.**

Steps:

To create a **Poll** in Messenger:

Tap on + and **select Polls** in a group chat.

From there you can add a question for your friends to vote by selecting

Type in the **Poll Question**. (DO YOU AGREE ON FACE TO FACE CLASSESS OR NOT?)

Select Options, (YES or NO)

then tap **Create Poll** to submit your topic to the group chat.

Rubrics for Application

	Criteria			Points
	3	2	1	
Relationships between concepts	Clear relationship between concepts. Hierarchical organization from components to sub-components.	Relationship between concepts evident. Components and sub-components present.	Unclear relationship between concepts. Components and sub-components unorganized.	
Cross-linkages	Logical linkages. Clear and thorough explanation of links. Information is clear, accurate and precise.	Logical linkages. Explanation of links unclear. Information is accurate.	Linkages do not make sense and are not explained. Information is inaccurate.	
Presentation	Presentation is orderly and visually appealing. Demonstrates effective use of the elements of graphic design.	Presentation is orderly and effective	Presentation is not orderly.	
			Total	

Reflection

Cite some examples of impact of technology on learning and achievement of the learners?

How does technology affect your life? Positive or Negative? Why?
