

Yush's SFF PC Build: Computer Parts

Build Video: <https://www.youtube.com/watch?v=DGLVtKIkz1U>

bold = ordered

Thanks Gongy for the list! I use this as a Windows gaming PC.

Case

suggest like louqe or ncase or nr200 or dan a4 (mine)

nr200p: \$110 used: 376 x 185 x 292 mm

https://www.amazon.com/dp/B08BFJ8V8C/ref=cm_sw_r_awdo_RKKY2HGX7RB6QQQTFEVW

Lot more room, can get beefier cpu -- like h670m itx

louqe ghost:

<https://www.ebay.com/itm/154942406659?hash=item2413498003:g:hhsAAOSwcGpiU1Ng>

\$150 used, cosmetically imperfect: limited gpu compatibility, some trim the wires/replace fan

188 x 140 x 322 mm

Generally bigger, no reports online about fitting 3070 or 3060 ti

Dan a4: <https://www.newegg.com/p/2AM-000Z-00095>

\$150 ship by wed, extra \$20 for pci 4 vs 3

115 x 200 x 317mm

CPU

i5 12400 f: <https://amzn.to/3MxpgRP> \$220 used w 1 day ship, With stock cooler

If i7, need water cooler

Motherboard

any ITX z690 motherboard:

https://www.beachaudio.com/asrock-258707-mb-z690m-itx-ax-z690-s1700-2-dimms-ddr4-itx-retail/?utm_source=GoogleShoppingBCFeed&utm_medium=feed \$280 with 2 day

shipping, ddr4

Mike was broken, ended up switching to Asus ROG b660 itx

RAM

any ram (suggest 1 32gb so can upgrade): stupid ddr4 32gb: <https://amzn.to/3MyvE3P>

I bought this for \$150 for some fuckin reason, only retails for \$75 now so welp

Trashed that and got \$205 32gb ddr5 ram:

https://www.amazon.com/gp/aw/d/B09HW97JVF/ref=ya_aw_od_pi?ie=UTF8&psc=1

Because ROG B660 only compatible w DDR5

SSD

samsung or **crucial 2tb nvme**, make sure 2gbps speed: <https://amzn.to/3G0GzAV> \$170

Power

corsair sf600 power supply: <https://amzn.to/3G0S6jq> \$135

maybe sf750 if price diff is \$<26\$: <https://amzn.to/3lv6RBE> \$165

GPU

3060 TI, \$500 off of eBay or amazon alerts
