

. ActRealz Development Portfolio

Hello, I am ActRealz I am quite of a new Roblox Developer, my best skill in development is building. For example, Making Buildings and stuff out of roblox parts and other things that roblox studio provides you.

Work Experience:

At this time I do not have any work experience in any games.

Notes:

I am still learning per day on how to do things in Roblox Studio.

Development Pictures:

Parking Lot:

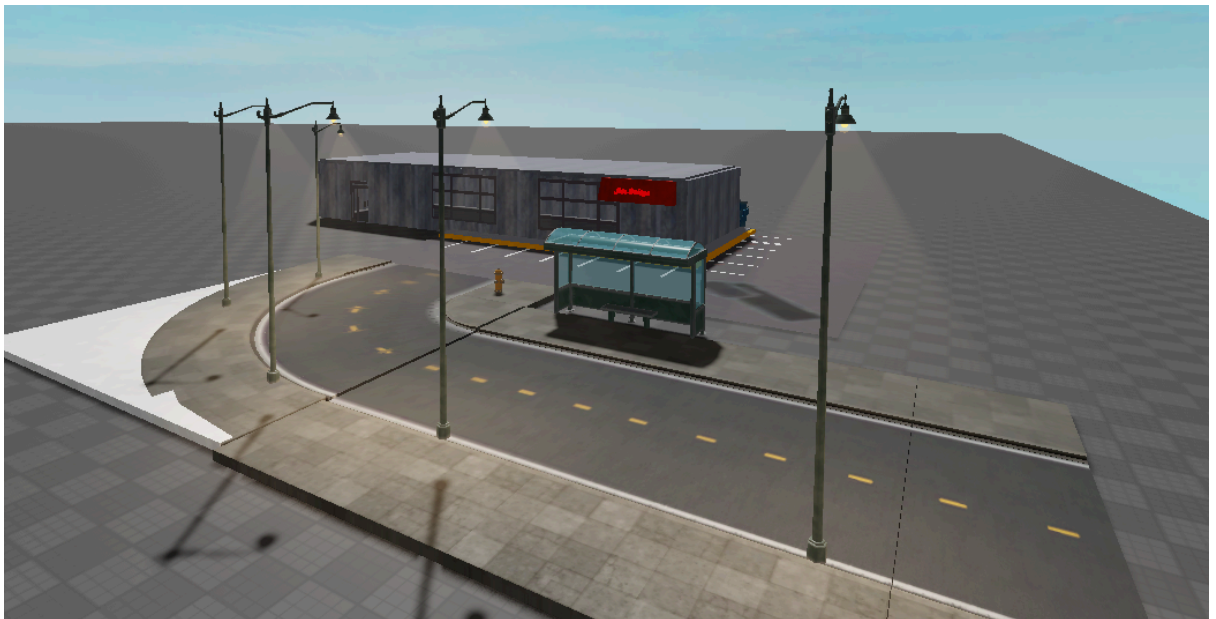

This includes different models (not made by me) this also includes many details such as; Road Debris, Bus Stops, Street Lights & a fire hydrant.

Tim Hortons:

Ref Pic:

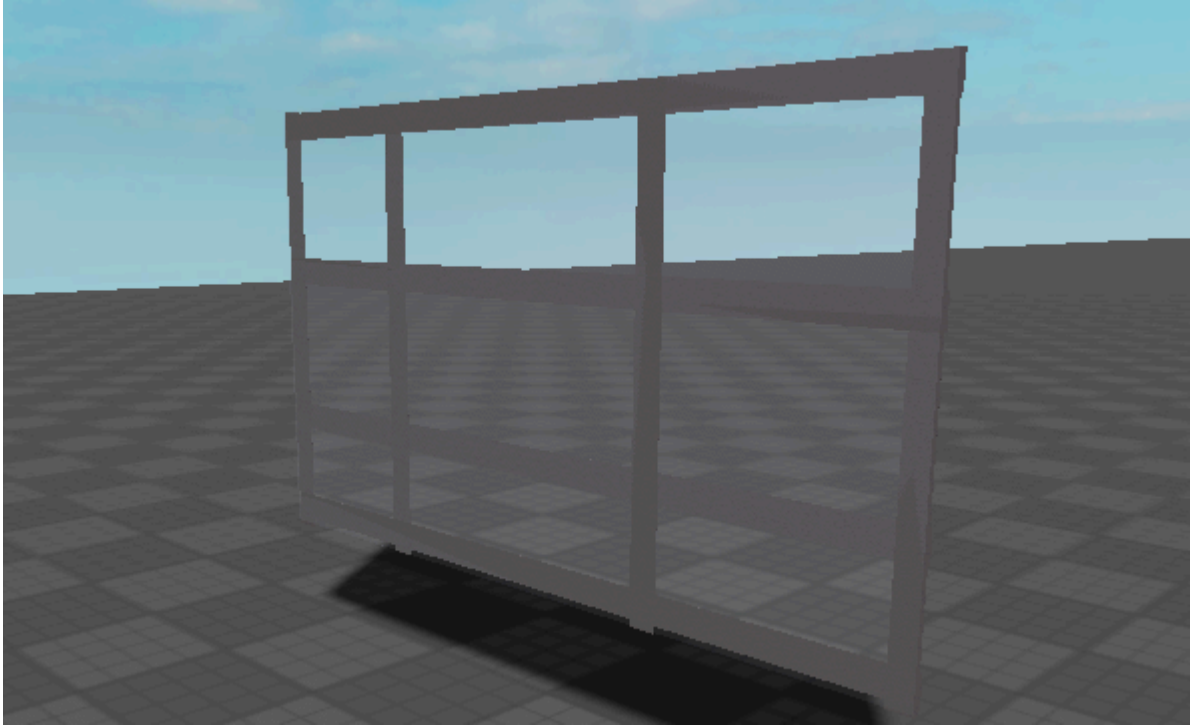

Build:

Not much detail but it includes; road, street debris, parking spots, bus stops, lighting and lots more. This took about 20-30 mins to do as I was thinking of a name and stuff like that.

Homemade Window:

This window is made of roblox `Parts` and was very easy to make. This was also used for the Tim Hortons above.

McLaren Formula 1 Team Pit Wall:

Reference Picture:

Roblox Studio:

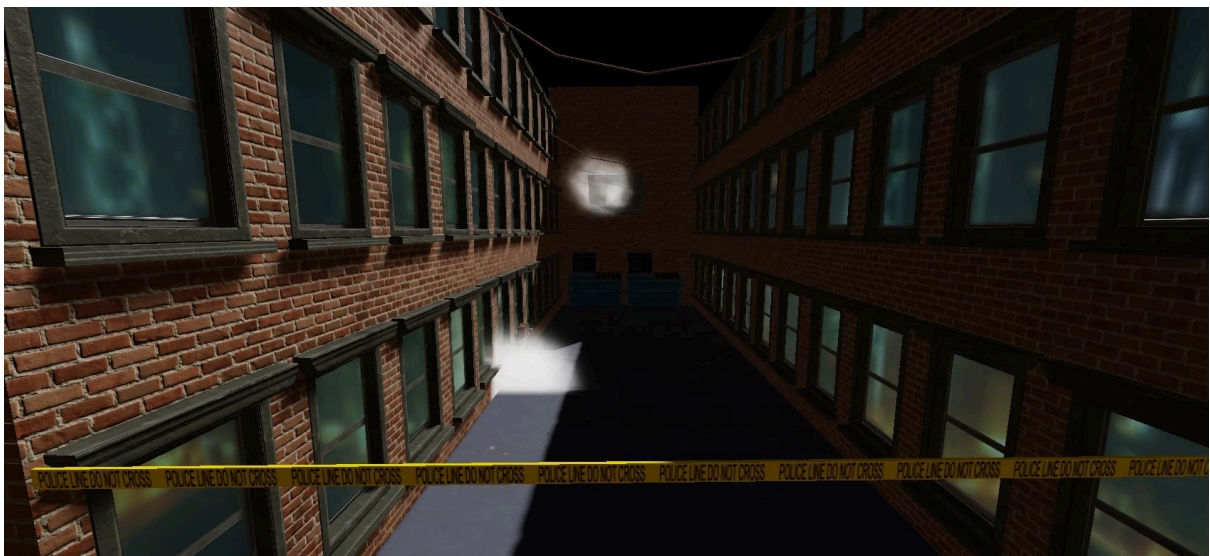

This is all made from roblox studio parts and plugins. I used the 3D Text Plugin to make the 'McLaren' on the top. It also includes homemade chairs and computers.

New York Sketchy Alleyway:

Reference Picture:

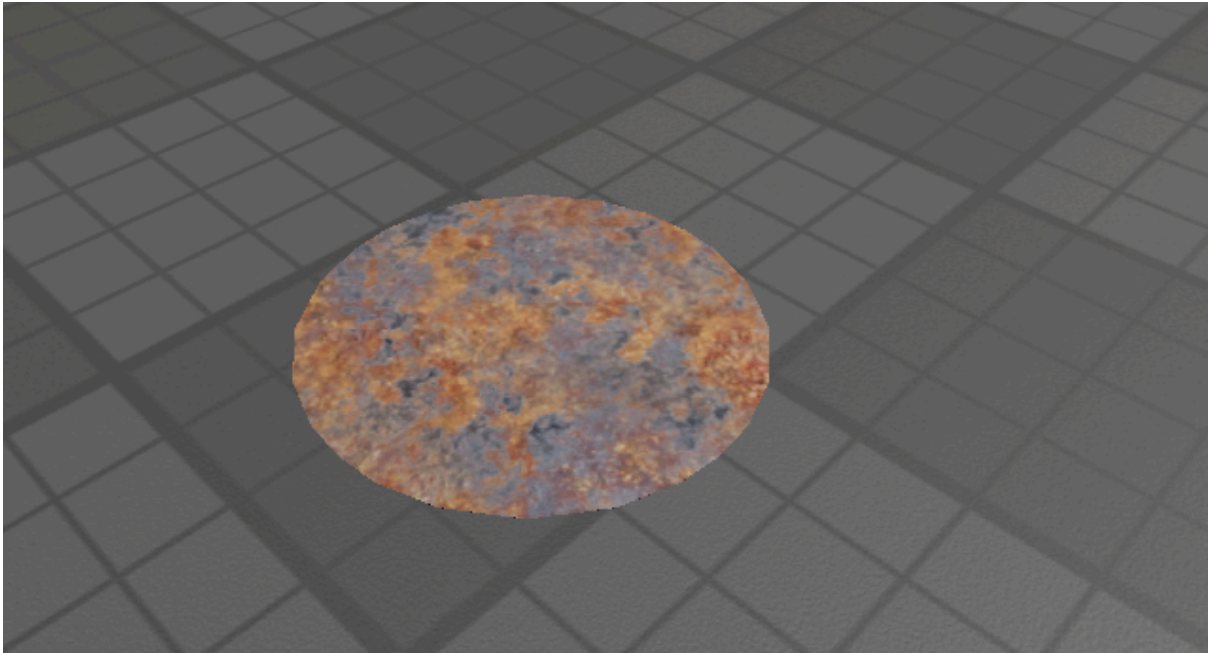

N/A (no reference pic)

Build:

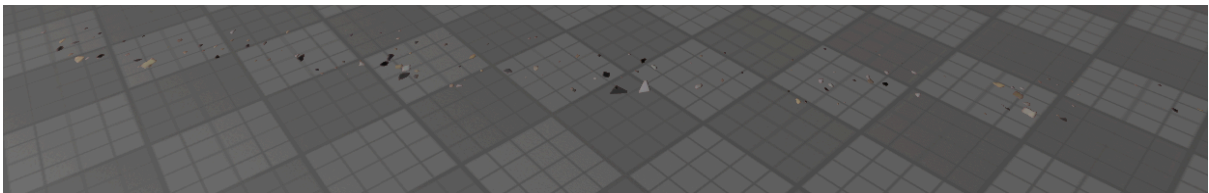

This Alleyway was based off some alleyways I've seen and imagined in New York, I most have seen them in Movies/Tv Shows as myself, have not been to New York City. There are some models that my buddy provided like the Garbage things at the back and there is a ventilator at the back, there is a handmade sewer and the left, you cannot see it due to the smoke but it will be below. The Tape & Ropes are made by a rope plugin that I have.

Handmade Drain:

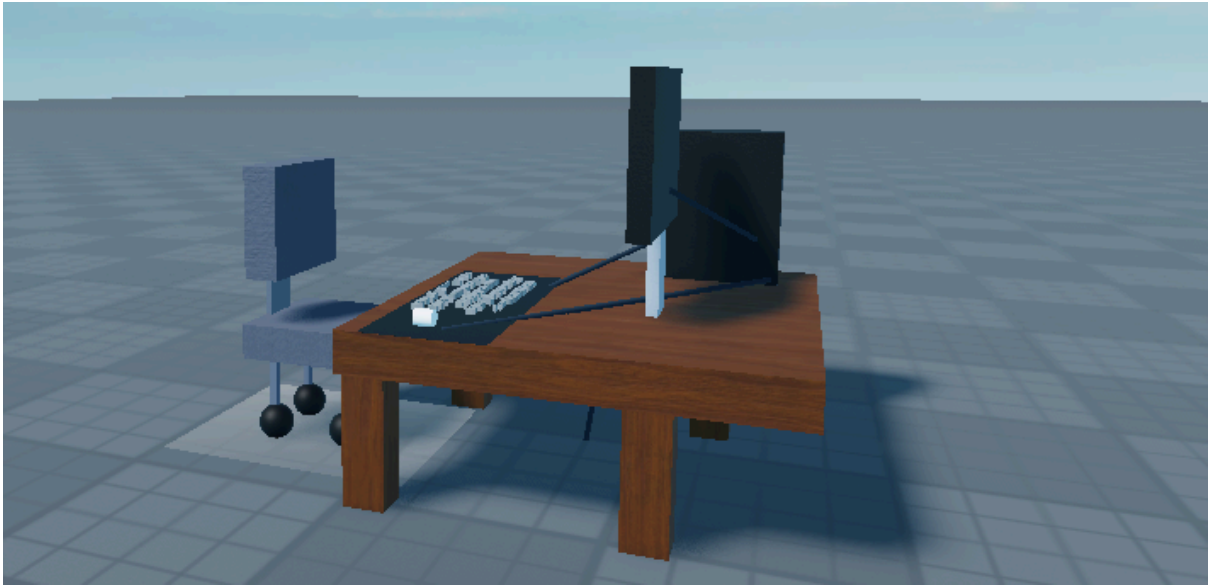

This drain is a cylinder that is resized down and with the Corroded Metal Material.

Road Debris:

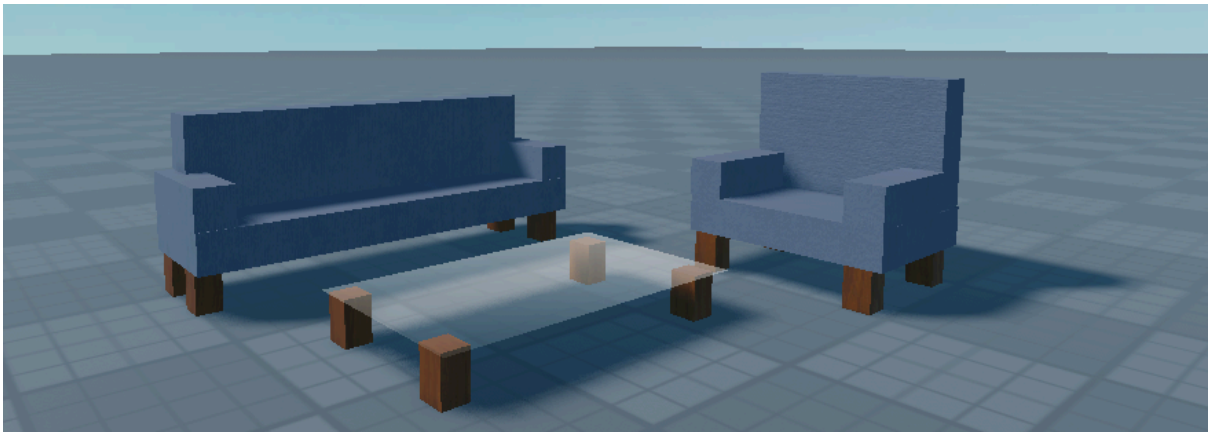

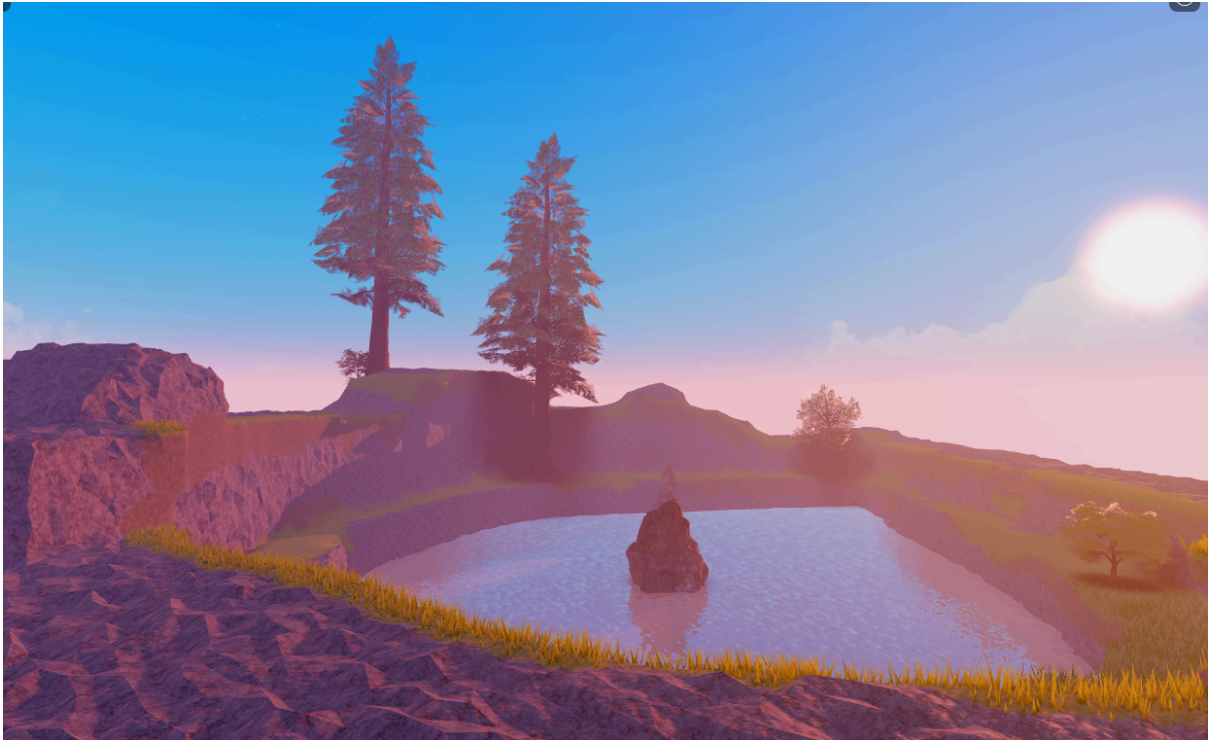

This is made full of different decals that I made and put into blender then inserted into roblox.

Desk/PC Set:

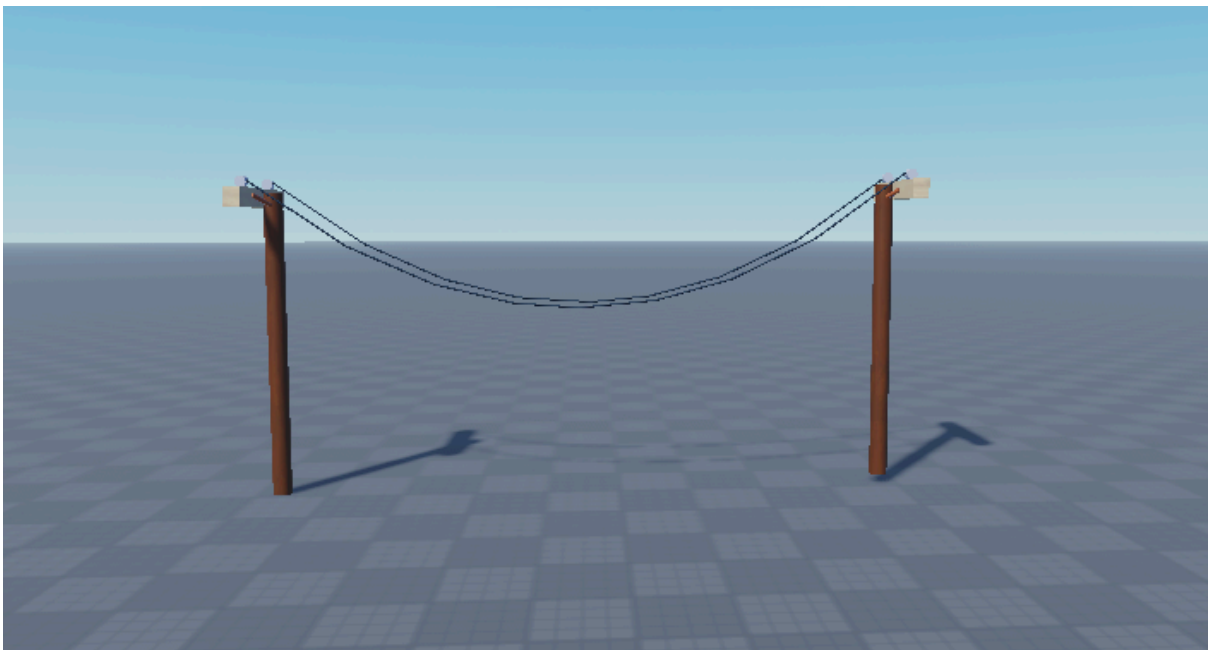

Sofa/Couch Set:
