Here, you can add character backstories.

Here, you can add foreign countries. And organizations?

- Shenai is a large country on a continent to the East of the one we're on right now. It's based on my extremely limited knowledge of traditional Chinese and Japanese culture. It's had lots of interactions with Toa'tani over the past couple of centuries, leading to a mixing of culture, mythology, religion, and lifestyle.
- Toa'tani is inspired by the people of Polynesia, though the land itself is larger and more centralized. It spans a large, dense archipelago that bridges the gap between the Eastern continent and the Western one.

Here, you should add all the other stuff!
