Dear Friend:

I knew you would like to be a television presenter well I think that you would need to become a really relaxed person because talking in public and in the television can be very difficult also I think you will need to read fast and remember the words you got to say. But don't worry I think it won't be difficult for you because you always want to become a television presenter.

On Wednesday 26 of May the municipality organized a tennis tournament almost all the city went to see it but what nobody saw was that the winner of the tournament (Felipe Campusano) commit a fault.

It was in the last five minutes of the game Felipe Campusano and Benjamin Caceres were tied and in the last minute Felipe Campusano hit the ball and won. But nobody saw that the ball it had already bounce two times when he hit it.

Everybody went to congratulate Felipe Campusano and I was speechless. The referee did not do anything.

This type of things are unacceptable for the players and the ones that went to saw the match.

Aruba is an Island located in the Caribbean Sea near to Venezuela and other islands. It is 30km long so you can imagine it is not so big; people all know each other and are kind with the tourists. In Aruba you would never see someone angry. There are many hotels for you to stay and there are beaches all over the Island. You can go to see the natural pools and natural bridges, the butterfly farm, etc. There are a lot of nice malls for you to go shopping and there are

restaurants for you to eat. But if you go to Aruba you will definitely have fun and want to go again.
