The Challenge 20/20 Project - Digital Divide

An initiative and collaborative service program conceived and implemented by IlearnIT students and MS/HS Tech Gurus.

Six IlearnIT students decided to take up the "The Challenge 20/20 Project - Digital Divide" as their Quarter 2 project. It all started from here. How can we bridge "Digital Divide"?We started off with discussions and with the help of a parent and our IT director identified a suitable project. We decided to set up and donate desktops for Seva Samajam School/ Orphanage.The group members went to the orphanage for an initial visit on 9th April 2014. We looked at the facilities available there, talked to the students, teachers and other authorities. During the initial visit, we observed and asked questions about the requirements of school. Back in school we co-ordinated with the Tech Guru club and the IT team to format and arrange 20 desktop sets to be delivered to the school.

The Digital Divide and Tech Gurus group has put in a lot of effort in getting the 20 desktops to be delivered to "Seva Samajam School". They are packed and are ready to find their new home (or rather Lab). We sincerely thank the school, specially Kevin Crouch, our IT Director, Sathish and Ramesh (our IT support) and Ms. Viraj Thakore for encouraging us.

Setting Up desktops

Group Meeting in ILearnIT class

At Seva Samajam...

Assembly: Mr.Crouch presenting " Certificate of Promise" to Seva Samajam School Principal

The MS/ HS Tech Gurus formatting systems...
