- Super clean layout!
- It's really organized, but we'd love to see more of the photos you took!
- It would've been nice to see the project and its' rationale as well

- Very clean, easy to navigate, video worked
- Super accessible, I love the way your site is formatted

Good format and nice rationale for your text, perhaps if you were to improve you could include more possible inputs or branches in the decision making?

- Like the coding-look of the website, really easy to navigate between pages

I like the button incorporated, nodding towards your CS background

Well designed site, but the composing project photos seem to blend into the aesthetic, and we almost skipped over it. Center aligned paragraphs were also jarring when the rest of the website is left aligned

Perhaps link all blog posts to pages, since we may be using this for more than just portfolio one

- Maybe link each piece of writing at the top of your site

Trey Frank

Like the use of a video for the composing project, but the other texts are not part of the website, a viewer needs to be signed into a google account to access them. Perhaps consider making them separate pages on the website.
