## Freelancing/Experience

**AI Agents**| *Composio* | [Repo](#)                                          **Sept 2025 - Current**
- Building an AI agent to automate the entire YouTube publishing pipeline from Notion .

**Founders Office** | *TDD* | [My work](#) (Experiment)                       **June - July 2025**
- My work was around social media, generating 10,000+ views across multiple client instagram handles with the help of video editing, graphic design and posts.

## PROJECTS

**MnemonicsAi** | *NextJs* | [Visit website](#)                                **Nov - Dec 2024**
- Built a website that turns classic mnemonic learning into unlimited, free memory aids using the Gemini API with fine-tuned prompts—hit #2 on tinylaun.ch with 10+ daily users, all organic and with zero marketing spend.

**SoBoards** | *Nextjs* | [Visit Website](#) (Experiment)                       **Dec - Mar 2025**
- Offering website design and development, to outdoor ad agencies in Mumbai, created [case study blogs](#) and [reels](#) on brand storytelling with outdoor ads (3+ daily readers, powered by Sanity.io), and earlier built an eCommerce setup for billboard listings with [devops](#) included.

## LEADERSHIP EXPERIENCE / Extra-Curricular

**Apple Swift Student Challenge winner**                                         **Mar 2025**
*Ar Mastermind*
- Built an [AR board game](#) using SwiftUI and RealityKit within 25MB constraints; showcased optimised 3D rendering, offline functionality, and immersive UI experience on Swift Playgrounds - ipad.

**Google developer students club - Core Team**                                   **Mar 2023**
*Member*
- I helped run things at the club—handled tasks, supported with documentation, and even gave a tech talk on Git and GitHub with a teammate to an audience of over 60 people.

**Hackathon**
*Frontend*
- Joined 3 hackathons—runner-up in one! Built a feel-good video site using the YouTube API and led frontend. Also built the full frontend for a Web3 project [link](#) . Build [Verigrant](#) ai agent.

**Tools and platforms:** Git, AWS EKS, Docker, VN, canva     **Databases**: MySQL

## INTERESTS

I'm passionate about using software to solve real-world problems and love exploring startup operations and strategy. Outside of work, I enjoy badminton and basketball, and I managed cosplayers like Spider-Man, Darth Maul, and Ichigo at ComicCon 2025 for EchoStudios. As a freelancer I built [this](#).
