

WORLD SPACE WEEK

Implementation Report

Al-Abna Fourth Primary School at the Air Base

Activity Leader	Mohammed Abdulrahman Al-Shehri
School Principal	Khalid Jaber Al-Faifi

1. Introduction

World Space Week was implemented at the school as an educational program designed to introduce primary students to space, astronomy, planets, spacecraft, and scientific exploration. The program combined awareness, visual learning, student participation, and creative activities.

2. Objectives

- Raise students' awareness of World Space Week and space science.
- Introduce students to the planets and basic concepts related to the solar system.
- Encourage scientific curiosity, research, observation, and discovery.
- Develop creativity through drawing, coloring, and space-themed student work.
- Promote student participation and connect learning with enjoyable educational activities.

3. Activities Implemented

- Publishing and sharing the World Space Week announcement with the school community.
- Using educational media and space-related awareness materials.
- Planet coloring activities to help students identify the planets of the solar system.
- Drawing and coloring rockets, planets, and space scenes.
- Student-designed awareness posters and informational work about space.
- Sharing educational space content with students through class communication channels.

4. Outcomes

Students demonstrated positive engagement with the program and participated in creative and educational tasks. The activities supported recognition of planets, increased interest in space exploration, and provided opportunities for students to express what they learned through drawings, coloring, and informational products.

5. Conclusion

World Space Week provided an engaging learning experience that combined science, creativity, and participation. The implementation contributed to strengthening students' interest in space and supported the school's efforts to enrich learning through purposeful extracurricular activities.

6. Evidence of Implementation

The following photographs document the announcement, educational communication, student activities, drawings, coloring work, and awareness products completed during the program.

Evidence of Implementation

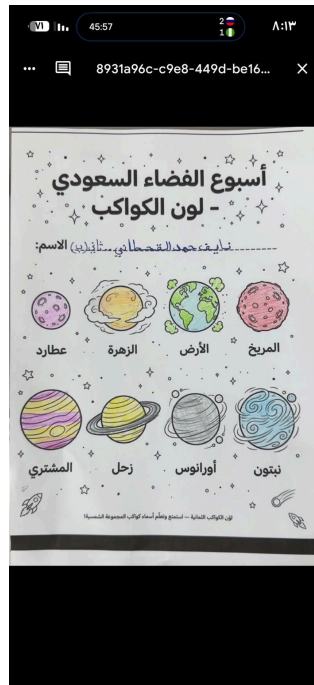

World Space Week school announcement.

Student planet-coloring activity.

Evidence of Implementation

Additional evidence of the planet-coloring activity.

Student participation in the planet-coloring activity.

Evidence of Implementation

Student awareness poster about World Space Week.

Sharing educational space content through class communication.

Evidence of Implementation

Sharing the school announcement through class communication.

Student rocket drawing and coloring activity.

Evidence of Implementation

Student informational work about space.
