

Create 100 Fiverr Accounts Safely

Every year, millions of dollars vanish due to banned accounts, checkpoints, or payment limitations. The main cause isn't policy violations, but rather platforms detecting ABNORMAL PATTERNS in your operational behavior.

Fiverr and other platforms use Machine Learning to analyze user behavior. Once they detect signs of multiple accounts from the same device, their algorithms automatically flag and apply restrictions.

Common Issues When Running Multiple Accounts

When operating multiple Fiverr accounts without proper protection, you'll face:

****1. Account Linking****

Fiverr detects multiple accounts from same fingerprint

When 1 account gets banned, all related accounts are affected

Trust score drops significantly, difficult to recover

****2. Payment Issues****

PayPal/Stripe holds funds due to suspicious activity detection

Credit cards get declined by fraud detection systems

Accounts get limited, unable to withdraw funds

****3. Verification Loop****

Constant requests for phone/ID verification

Cannot create new accounts due to limits

Waste time and money on verification processes

****4. Scaling Limitations****

Unable to increase account numbers

Performance degrades when managing multiple accounts

Loss of focus due to security concerns

Multilogin Cloud Phone: Next-Level Protection

Beyond antideetect browser, Multilogin also provides ****Cloud Phone**** solution - virtual mobile devices for situations requiring mobile fingerprints.

Use Cases For Fiverr:

1. Mobile-First Platforms

Some platforms like TikTok, Instagram prefer mobile traffic:

Cloud Phone provides real mobile fingerprints

iOS and Android emulation

Native app behavior simulation

Mobile IP addresses

2. SMS Verification

No need to buy hundreds of SIM cards:

Virtual phone numbers

Receive SMS online

Disposable numbers for testing

International numbers support

3. App-Based Activities

For tasks that cannot be done on web:

Native app features

In-app purchases

Push notifications

Location-based features

4. Ultimate Security

Combine browser plus cloud phone:

Web activities on Multilogin browser

Mobile activities on Cloud Phone

Cross-platform consistency

Maximum anonymity layer

Especially useful for MMO Marketing when running both desktop and mobile campaigns simultaneously.

Case Study: Affiliate Network With 200+ Accounts

Background: David runs affiliate network, manages accounts for team members.

Scale: 200+ {platform} accounts across 10 team members.

Previous Setup: Each team member managed own accounts, inconsistent, 30% ban rate.

New Setup With Multilogin:

Multilogin Scale plan (1000 profiles)

Centralized management dashboard

Standard SOPs for all team members

Profile sharing and collaboration

Impact:

Ban rate decreased from 30% to 2%

Team productivity increased 3x

Onboard new members in 1 day (vs. 2 weeks)

Monthly revenue: \$180K+ stable

Lesson: *At scale, consistency is everything. Multilogin allows standardizing processes across entire team.*

Troubleshooting Common Issues

Issue 1: {platform} still detects accounts

Check proxy quality (datacenter proxies easy to detect)

Ensure fingerprint consistency (don't change settings)

Age accounts properly before activity

Verify timezone matches IP location

Issue 2: Performance lag when opening multiple profiles

Multilogin requires decent hardware:

Minimum: 8GB RAM, quad-core CPU

Recommended: 16GB+ RAM, octa-core CPU

Close unused profiles

Use profile groups and launch by batches

****Issue 3: Payment issues with code SAAS50****

Ensure entering correct code: SAAS50 (all caps)

Check that you're new customer (code for new users only)

Contact support if issue persists

****Issue 4: Selenium/Puppeteer won't connect****

Verify Multilogin API enabled in settings

Check port configuration (default: 35000)

Update Selenium/Puppeteer to latest version

Check firewall settings

Exclusive Offer: 50% Off First Month

If you decide to invest in Multilogin (and this is the right decision for MMO Marketing), don't miss this offer:

[SIGN UP MULTIOLOGIN HERE](<https://saasverdict.com/go/multilogin>)
