

Download the Rosenthal NCE/CPCE exam prep app (its a purple app) if you have a smart phone. That helped me a lot. They have review quizzes and practice tests for all of the subject levels.

Go online to [tests.com](https://www.tests.com) and buy the material for the NCE (its a bundle type deal with flash cards, practice tests, etc). That probably helped me the MOST. There are 700 questions that they alternate in and out of practice tests. You can choose the number of questions on a test and the amount of time you want to give yourself. At then end it'll give you a score and also explain the answers to questions that you got wrong. I think it ended up taking so many practices that it was roughly 2500 questions that I answered in the course of my studying with this alone! It will repeat questions after a while, but it does not go in the same order, so you have to learn the material to be able to remember the answer the next time you see it. HUGE HELP! I think it was \$40 to buy it.

Get the book that Im attaching a picture of. I used this in the beginning and then again later to review. There is study material for each topic and then a practice tests on that topic. Also gives you explanations to answers. It was a good resource. I got it off amazon.

There are also a lot of free tests you can take online. I think I took them all at one point or another!

It was HARD- mostly because it was very specific in nature. Not wanting to scare you, but STUDY!!!! I studied my butt off and I still failed the first time by 6 points. :(I was devastated because I did not know what else I could have done. The second time I was much more relaxed because I knew what to expect, and I made 136/160. If you need anything else let me know!!! Good luck!! :)
