

Drip Tray Cover Skale 2 Adapter Assembly Instructions

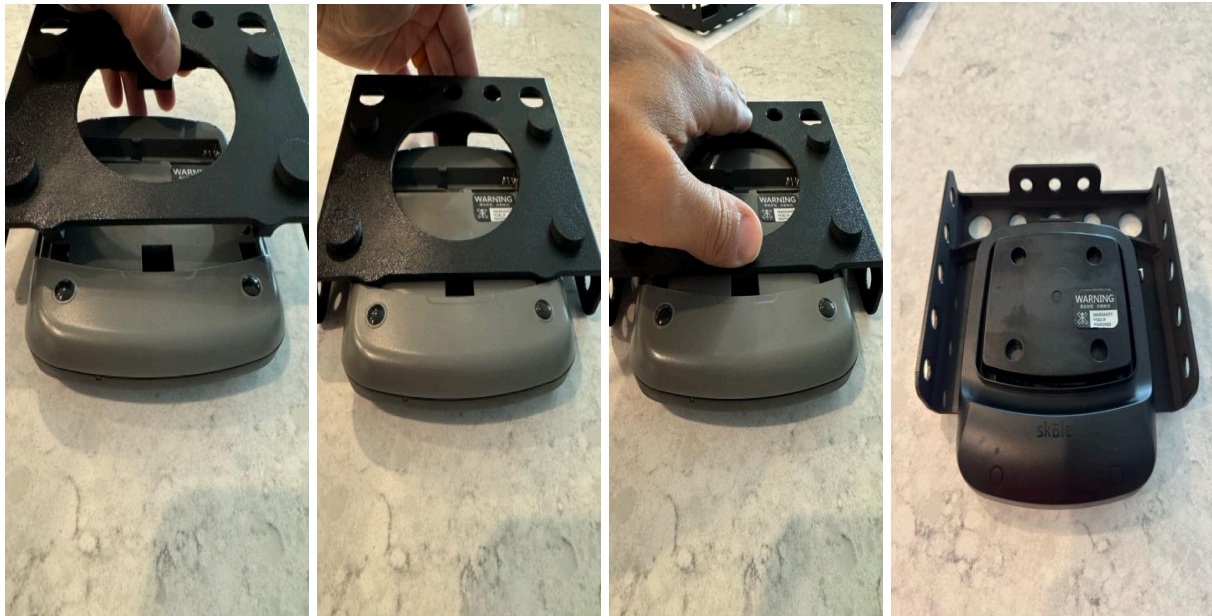

Step 1. Locate Caddy and your Skale 2. (see picture below)

Step 2. Remove Skale 2 top plate and battery cover. (as shown below)

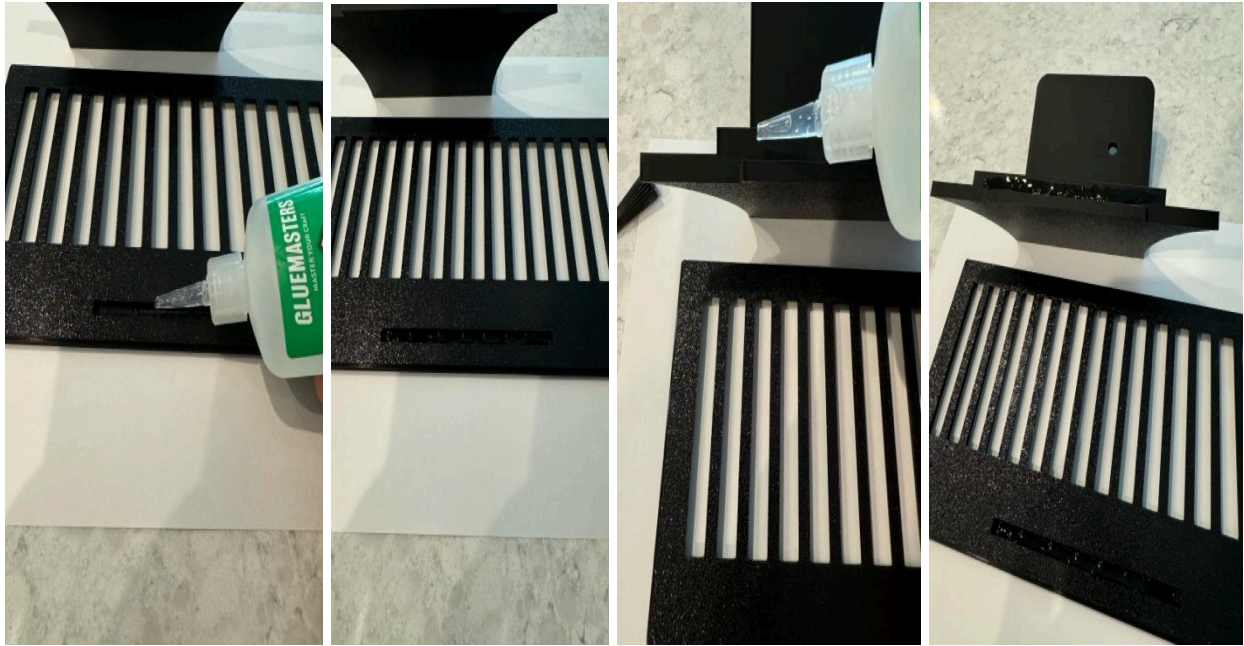

Step 3. Attach Skale 2 to the supplied Caddy piece. Placing the 2 front tabs on the slot first then pressing down to lock into place. (See Picture)

Step 4. Grab any Cyanoacrylate Glue and the supplied Grate and Bracket (As Pictured)

Step 5. Glue top Grate to Adapter Base, being careful not to use too much glue as it can get pushed out and not be aesthetically pleasing. (Apply only to the areas shown below.)

Step 6. Assemble the Adapter Base to the Grate so pressure can be applied for glue to set (approx. 30-60 seconds as shown below)

Step 7. Let glue dry for approx. 30-60 minutes to bond properly before finishing the assembly.

Step 8. Once dry, you can do the final assembly. Grab your Skale 2 attached to the supplied Caddy and glued Grate and Adapter plate. (as shown)

Step 9. Remove the “warning sticker” on Skale 2 and remove the Left bolt if facing the front of the scale. *using a 3MM Allen Wrench * Easiest way to get the sticker off is to push on the center. (as shown below)

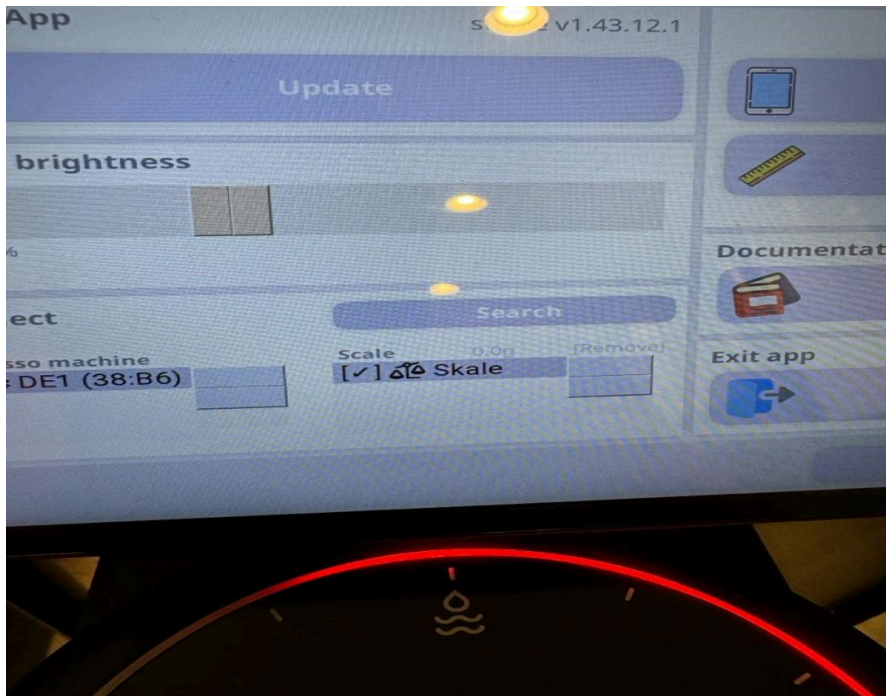

Step 10. Install the Adapter Base onto the Skale 2 and re-use bolt that was removed, be sure to only snug the bolt ***DO NOT OVERTIGHTEN*** (see below)

Step 11. Remove the Decent Grate and run the USB cord through one of the holes in the caddy and plug in Skale 2, then slide it all in between the frame of the DE1. (see pictures below)

Step 12. Power on your Decent De1 and go into the settings to pair the new Skale 2. (see below for the screen) 12a. Press and hold the right touch button on Skale 2 to power on and put in pair mode. 12b. Press search on decent tablet on the settings screen. Once Skale pops up, select it on Tablet and then a check will be placed next to it. Should get a pop-up message that the scale is reporting on Decent Tablet.

Step 13. ENJOY YOUR NEW IMPROVED WORKFLOW, AND BREW SOMETHING GREAT!
