

Connections! Original Idol Project

Master Document

*(Info will be added as production progresses)

Welcome! I'm Azia, and this is the document for my new original idol group! Please take a look at the info below, and if you have any questions, feel free to ask me on discord. I'm super excited about this project (in fact, I've dropped almost all my other projects for this, and I'm aiming for much higher quality on this than any of my normal covers) and I hope to work with a talented staff who will help me achieve my goals for this group.

If you're wondering what an online idol group is, you should check out [Interlunium](#) and [Legacy](#) ! This is what I'm aiming for, but I won't be able to do it alone. If you're an artist, composer and/or are able to use an electronic music software, and you're interested in being a part of this project as a staff member, please fill out the form below!

<https://forms.gle/itbt5HbY6TEDs1Lo9>

If you're only interested in being a vocalist, please fill out this form instead:

<https://forms.gle/tSQAMmdo6nSKi2PC8>

Note: payment may or may not be available off the bat. I have an extremely limited budget at the moment, but I hope to be able to compensate the staff for this project in the future.

ALSO please note that all group info regarding the story, themes and idols are subject to change.

General Info:

Connections! is:

- ❖ an upcoming online idol group composed of 9 members, all students at Senzaitekina International High School
- ❖ a semi-professional project consisting of original songs in English and possible short voice acted story segments. Ideally, our music will be up for download & streaming, and we will have a public discord server

The story:

- ❖ Connections! is set in a futuristic Tokyo, where scientific advancements and technology have begun to chip away at society's vibrancy. Ayaka, a junior at SIHS, faces an eternity of her perfect, ordinary life. But living forever doesn't seem appealing without something to live for, and she decides on an impulse to form a 21st century style idol group in an attempt to connect with others through the power of music

Group themes:

- ❖ Connection

- ❖ Future - potentially including space themes
- ❖ Technology - don't worry, this is *not* in fact going to be anti-technology propaganda, because then the whole group would be extremely ironic
- ❖ Individuality - standing out is hard enough when the world's population is only 8 billion)
- ❖ We'll see!

What am I looking for right now?

- ❖ The best shot at making this project a success is to create the art and music for the first single before/during vocalist casting. My experience with previous projects has taught me that vocalists are most likely to get excited about the project and turn in their lines if they don't have to wait forever for material. So currently I'm looking for artists and instrumental composers—whatever you can bring to the table is great. I need composers to let me know how they typically work; my idea was to write lyrics and melody for the first single myself, but if you prefer to operate differently, that's great too!

Requirements

- ❖ You must be:
 - ❖ able to communicate on discord and respond to messages reasonably quickly
 - ❖ willing to make revisions to your work if necessary
- ❖ not working on a billion other projects, unless you're certain you can handle all of them. I don't expect or need you to dedicate your life to this, of course! - but I do want to get things done
- ❖ friendly and respectful

The Idols:

links will take you to character folders, with avatar creator concept art since i can't draw
