Gaming PC Buyers Guide 2025 (Australia Edition)

Buying a gaming PC in 2025 has never been more exciting — and confusing.
Between new NVIDIA RTX 50-series GPUs, AMD Ryzen 9000 CPUs and AI-accelerated workflows, it's vital to choose the right build for your needs and budget.

1️⃣ Key Considerations

- **Performance:** Balance CPU/GPU for the games you play.
- **Cooling & Airflow:** Modern GPUs run hot — opt for liquid or high-static airflow solutions.
- **Memory & Storage:** 16 GB minimum for gaming, 32 GB for creation tasks; NVMe SSD is essential.
- **Aesthetics & Noise:** Radium's design-first builds use silent fans and clean cable management.

2️⃣ Prebuilt vs Custom PCs

Prebuilt: Ready to ship, tested and guaranteed stability.
Custom: Full hardware control and personal aesthetic.

👉 Read more in our in-depth guide: *[Prebuilt vs Custom Gaming PCs in Australia]* (link to your future blog).

Tier	Best For	Example Specs	Starting From
ARROW Prime	Esports & Casual Gaming	Ryzen 5 5600 | RX 7600 8GB	$1,149 AUD
Delta Elite Black	AAA Titles / 1440p	Ryzen 7 7800X3D | RX 9070XT 16GB	$2,699 AUD
Delta Titan Black	4K Gaming / Streaming	Ryzen 7 9800X3D | RTX 5090 32GB	$6,699 AUD
