.....UNIQUE / SET.....

Section:

Active this rule and click on it.

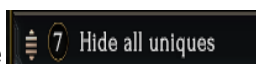

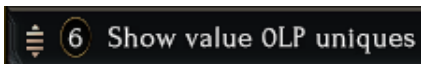

Search all related uniques with your build and check them.

When a related unique drop, it will be highlighted in red with a new sound than other uniques.

By default, I'd like to hide all uniques and highlight only the unique ones I want.

If you want to proceed like me:

Active  and 

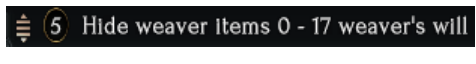

Click on "show value 0LP uniques and search all the unique with 0LP to be highlighted.

Active . By this, all unique with 2LP or more will be shown.

Do the same for set items, active  and .

Click on "Show set items" and check all set items u want to be shown.

I'd like to hide all weaver items with 0 - 17 weaver's will.

Active , you can reduce or increase the maximum weaver's will you want.

By default, the bosses/harbingers drop are highlight, u can uncheck this rule if u want to hide

them: 

.....IDOLS.....

Section:

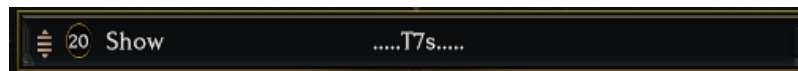

Active  12 Hide all idols affixs and  11 Show needed idols affixs .

Click on  11 Show needed idols affixs and check all idols affixs you want to be shown (check your planner if you follow a build guide)

.....T7s.....

Section:

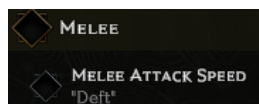

by default,  29 Hide useless T7s affixs hide cold, fire, lightning, necrotic, void, poison resistances and all resistances while channeling. Uncheck this rules if you need to build your resistances.

In this section, there are many rules to show T7s per armour or weapons slot.

For example, if you need increased attack speed on gloves, active  22 Show T7s gloves: (for lp) and click on them.

In **AFFIXES:** **None** , search “melee attack speed” and check the line

Do the same with all parts of armour or weapon slot, by this, the filter will highlight in blue with a different sound all T7s u need to transfert on an unique, or to craft with.

.....T6s.....

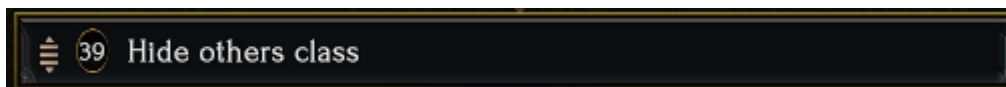

Section:

by default, hide cold, fire, lightning, necrotic, void, poison resistances and all resistances while channeling. Uncheck this rules if you need to build up your resistances.
