- The Authors should response all the Reviewers' questions and comments clearly. The Authors can express their disagreement about the Reviewers' comments, but should provide convincing evidences and comments in accordance with the prescribed ethical standards (please see the [Journal Policies](#) on the Journal website).

- In addition to answering the questions, the Authors need to revise the manuscript and highlight in red the edited content. It is recommended to use "Track Changes" in Microsoft Word to edit, but not to display the Author's name.

- After the revision is completed, the Authors should submit the following attached files via the [Online system](#):
