Essaydune.com Review Essaydune.com Review The company accepts multiple forms of payment. These include debit and credit card as well as paypal. We made payment via debit card and had no issues.

Pricing And Discounts

EssayDune prices skew just a bit below average. This could explain the quality issues with writing. However, we did find some EssayDune discounts these are based upon the total price of your order. Unfortunately, you have to place a fairly large order for these to apply. There is no EssayDune coupon code for this.
There is a blog on the website, and we have to say it’s pretty good. The topics are interesting and the posts are well written. Unfortunately, there’s not much interesting beyond that.

Prices

Essaydune.com Review **Essaydune.com Review** Like most writing services, Essay Dune offers some free features – bibliography, outline, and formatting. They also state that they check all products for plagiarism before delivering them to customers. In the order form, however, a plagiarism report is only provided at an extra fee.

Factor 5: Additional Important Considerations

Essaydune.com Review

Essaydune.com Review Essaydune.com Review We paid 21 dollars a page for a research paper with a deadline of just under a week. We feel that these prices are pretty fair. However, the low quality was problematic. It simply was not a good value for our dollar.

Mary Walton's conclusion on EssayDune.com

Review Criteria Essaydune.com Review

Essaydune.com Review Essaydune.com Review This is an academic writing service. They offer essays, research papers, book reports, movie reviews, thesis and dissertation, and other common services. They also offer editing and proofreading services.

Services – 2/10

Essaydune.com Review Essaydune.com Review We ordered an 8-page research paper with a 6-day deadline, and it was priced at $168.00. We also received the piece on time, and our instructions were followed. Comments on the quality of writing are covered below.

EssayDune.com Review

The following is our review of Essaydune.com. We took several steps to prepare for this write up. This includes placing an order for an academic paper, reviewing that paper for accuracy and quality, reading online customer reviews, researching this writing service, and verifying with the BBB that they are not a fraud or scam. In addition to this, we also explored the Essay Dune website.

Review Criteria

As with every other essay writing service that we analyze, we have several criteria that we expect EssayDune to meet. This includes good writing quality, professional and courteous customer service, fair pricing, and an easy to navigate website. We also give bonus rating points for quality web content and extra features.

Factor 1: Types of Writing Services Offered

This is an academic writing service. They offer essays, research papers, book reports, movie reviews, thesis and dissertation, and other common services. They also offer editing and proofreading services.

Factor 2: Trust and Reliability

Essaydune is mediocre in terms of trust and reliability. Yes, it does appear that people do receive the papers that they pay for. However, some of the claims made concern us. We believe it's possible that they are selling duplicate or low quality papers, especially when it comes to long or very complex academic documents.

Factor 3: Level of Quality

We were very disappointed in the quality of the research paper we received. The writing was error ridden, and clearly not written by someone with a firm grasp on the English language. Further, the sources they used were not up to academic standards. When we approached customer service, they offered no revisions or other help. Overall Essay Dune writing and customer service receives low marks from us.

Factor 4: Pricing and Payment

We paid 21 dollars a page for a research paper with a deadline of just under a week. We feel that these prices are pretty fair. However, the low quality was problematic. It simply was not a good value for our dollar.
The company accepts multiple forms of payment. These include debit and credit card as well as paypal. We made payment via debit card and had no issues.
There is a discount page. However, we were disappointed to find that none of them really applied to us. Companies normally offer a promo code for first time buyers. Here it only appears that coupon codes are available for volume and repeat orders.

Factor 5: Additional Important Considerations

We didn't really uncover anything interesting or of particular concern. Essaydune.com doesn't have much to offer beyond the standard writing and editing services. There is a testimonials page. We also read a few of their blog posts. Unfortunately, they weren't very interesting. They seemed to be written with the goal of promoting writing services rather than providing information or entertainment.

Concluding Comments

In going over the pros & cons, we ultimately cannot recommend this site for anyone. There are too many issues with quality. Further, some of the claims the company makes are quite outlandish. We believe this could be a fundamental lack of understanding of academic writing. This was made evident to us when we were told the company could research and write a dissertation within a time period of two weeks. Something that is ultimately impossible. Therefore, despite some positive testimonials we rate this writing service with a quality level of low.

Quality of Services Offered

Essaydune.com Review Essaydune.com Review There is a small section stating that writers all have credentials and writing experience and are assigned according to their areas of

expertise. The quality, however, was of concern in some of the customer reviews we read, as well as in the product we received from the company.
