EXPERIENCE *(All Experiences are 100+ PB)*

Blaze Gaming — Vanilla Manager

April 2020 - Current

Blaze Gaming is a primarily Pixelmon Network which is looking to expand into Vanilla gamemodes which began with Skyblock and Survival. As this is still an early position, it is too early to give accurate numbers regarding the size increase in players on the server (However, Skyblock did peak 110 players which is a first for the network since I took over.)

SpaceDelta — Network Manager

May 2019 - August 2019

I worked at SpaceDelta as one of two Network Managers. After an unsuccessful first map I took over full control of the network to make the best Faction maps possible. After three months of service at SpaceDelta I went on leave due to school examinations and made redundant during this time. Since SpaceDelta, I also briefly worked with TK on a smaller project of theirs.

ReefCraft — Network Manager

May 2019 - June 2019

ReefCraft is a Skyblock server which aims to give a bug and lag-free experience to members of the community. Some ex-Minesharp Members had joined ReefCraft as a “new hope” with a much better management team consisting mainly of past Minesharp Members. After my management, there was an increase from 70 to 150 online at peak times on their second season.

Minesharp Network — Network Manager

September 2017 - June 2019

I worked at Minesharp as one of two Network Managers for around 18 months, running as the front-end for all communications to the management team in general. I handled all Resets, Staff, Events, Updates and more. During my time at Minesharp, the server had increased from 40 players concurrent to over 200 at peak times.

SKILLS

Community Management

Staff Management

Network Management

Configuration

Purchase Support

Forums Management

& more

PVPEra — Manager

August 2018

I joined PVPEra back in August 2018 to take control of all Staff and Community management on the server. So far, I have re-written the way the server discord has been done, Re-setup the Forums & trained all staff efficiently to be able to work with my standards.

Since the re-release, we managed to reach 120 members on our release. Shortly after, the server was merged into UniverseMC.

Daedric Networks — Moderator

~ Mid 2016

I was a Moderator on Daedric Networks Factions server at the time. I mainly moderated and screenshared members who were suspicious in PVP.

Daedric Networks had around a 200 Playerbase at the time when I was staff, later decaying to a low 20 playerbase.

OTHER EXPERIENCES

Miniga.me — Administrator

BattleMade — Manager

OpticPvP — Manager

EnforcedMC — Manager

PAYMENT

Payment can be discussed Via PMs, I am flexible depending on your budget and the size of the server I will be running. My base price for Management starts at \$30 per week, but can change depending on the tasks needed.
