

## About the Siblings.

### Background.

---

The year is 1995 and there is a program by a company that is far beyond their own time. This program's goal is to create robots that are as close to humans as possible. They create four robots that are physically around 25 years old and dub them siblings. They upload data to have them on the same page as a 25 year old person and they try to upload data for emotions and feelings like how humans feel. They do test the robots academically and then test their athletic abilities.

One is considered the oldest of the siblings. One shows signs of easy aggression and strength way beyond his siblings. One doesn't like to listen to others and wants to do his own thing more than anything

else. It appears that One took in a lot more data for being stubborn and rude than anything else. Though One does show protectiveness towards his siblings, quick to stop Three from getting hurt when Three was doing a cooking test. One is deemed a failure by the heads over the company but One's "parents" do not see One as a failure and make sure to tell One that he is perfect the way that he is.

Two shows signs of being reclusive but otherwise the "normal" one of the siblings according to the heads of the company because he expresses a variety of emotions and shows more intelligence than his other siblings do. It is believed that Two would be able to blend in with humans easily and be seen as another human by humans. Two is close with Three and since Three has a very dependent nature, Two lets Three be dependent on him should Three need to because he displays traits of a great older brother.

Three has been noted to have a rollercoaster of emotions, as if the data got jumbled up when it was being downloaded to her. Three also has an issue with her voice box, her voice sounding more robotic and sometimes even glitchy as compared to her siblings voice boxes being normal, it's something she is self conscious over. Sometimes her movements are a bit stiff and her system tells her there is an error somewhere but nobody could ever figure out the issue and assumed it was just a glitch that kept popping up and it was a glitch that they didn't think could be fixed. Three has shown to be very dependent on her siblings, especially two, due to her glitches and quick to switch up emotions. As long as she is with a sibling she feels comfortable because they can help others to understand her nature at its fullest.

Four seems to have only downloaded happiness. They do not show signs of ever being sad or perhaps their programming just doesn't understand the emotion at its fullest yet and will have to learn it over time and more data uploads. Four does seem to talk a lot and has a habit of clinging to others and invading personal space bubbles. They mean well but the company heads do not see Four as a realistic standard of how a human actually acts because no human is always happy like Four is. They are the youngest sibling as they were the last of the four to be created despite them all being brought online on the same day, thus making them considered quadruplets by the company.

The company wanted to release the siblings amongst humans and see how they integrated into society but because the heads of the company did not give them all a clear pass and the funding began running out, they decided to "shut the program down for now" on paper, though they left a constant data download to the robots when they put them in sleep mode, to make sure that they continued to learn everything happening in the world while they were in sleep mode.

.....But then the program was forgotten about, the area in which the robots were located still asleep was forgotten about even though the data continued to download for quite some time at least before it malfunctioned and shut down. Yet, it would be a long time before the buttons would be hit for them to be awoken and then it would be an accident on behalf of a rat nonetheless. The room where the robot's sleep pods were long forgotten and considered storage for many years until recently the sleep pods opened and the robots came back online near the end of the year 2021.

Nobody would notice the Robots wandering and then deciding to leave and explore since it was something they never did before and since the place they saw as home was more of a storage area, they decided to just go.

## About One.

### Basics

**Name:** One

**Gender:** Male

**Pronouns:** He / Him

**Age:** 25

**Birthday:** March 3rd

**Orientation:** Homoromantic

**Languages:** Most languages, main being English.

**Occupation:** Traveler

### Appearance

**Hair Color:** Blonde

**Eye Color:** Red

**Height:** 6'3"

**Notable Features:** Sharp eyes, dimples.

**Style:** no particular style, doesn't care about his appearance.

**Vision:** well above a humans

**Skin:** pale

**Scent:** Dust

### Personality

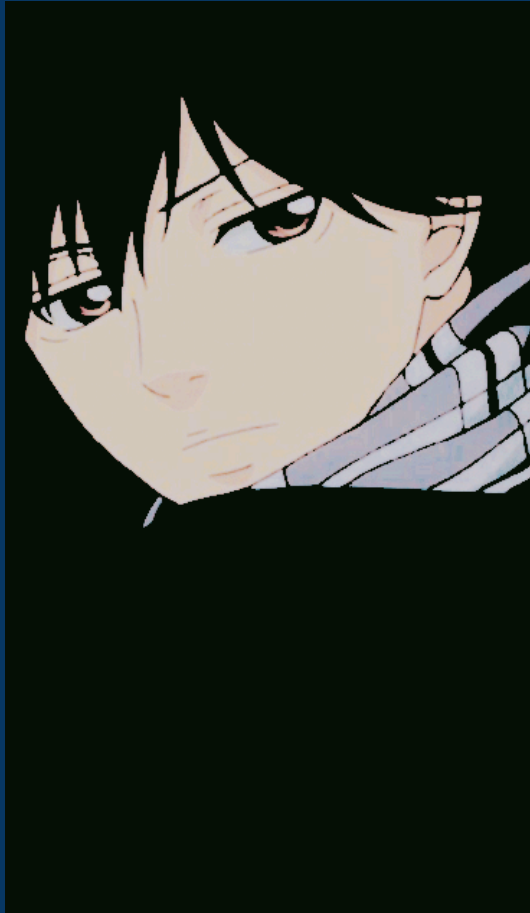

As stated above, One is quick to become aggressive and is much stronger than that of a human and that of his siblings, he is not afraid to fight someone should he need to. He does show protectiveness over his siblings as stated above as well and takes the oldest of the siblings position very seriously despite not outright displaying such. He is intelligent as well but not nearly as genius as Two, One just thinks of things quicker, perhaps having more street smart to him than academics.

### Trivia

- One and all of his siblings can touch anything electronic and pull power from them to power themselves, a power transference, though one's doesn't always work as well as his siblings so sometimes he's left getting less power than his siblings can.
- One and his siblings can also do a data transference the same way as the power transference words, a simple touch and off it goes.

- One is quick to get so aggressive because part of his data was corrupted when it was being transferred over and nobody caught it.

## About Two.

### Basics

**Name:** Two

**Gender:** Male

**Pronouns:** He / Him

**Age:** 25

**Birthday:** March 3rd

**Orientation:** Demiromantic

**Languages:** Most languages, main being English.

**Occupation:** Traveler

### Appearance

**Hair Color:** Black

**Eye Color:** Honey Brown

**Height:** 6'0"

**Notable Features:** Eyes

**Style:** dark colors. He doesn't like bright colors. He does like cardigans and sweaters.

**Vision:** well above a humans

**Skin:** pale

**Scent:** Dust

### Personality

As stated above, Two is rather reclusive but considered the most normal one out of all the siblings. He can understand and display all emotions whereas his siblings struggle in that aspect. He is considered the successful sibling because all his data came through perfectly and he is rather intelligent, the most intelligent of all his siblings. He doesn't brag, bragging is stupid, instead he prefers to see himself as an equal to his siblings and would do anything for them. He is especially close to Three and fiercely protective of his sister.

### Trivia

- As stated above, Two is close with Three and since Three has a very dependent nature, Two lets Three be dependent on him should Three need to because he displays traits of a great older brother.
- Two loves books, learning through books feels like more fun to him rather than doing a simple data transfer. Data transfers feel like a cheater's way of learning. He wants to learn the human way.

## About Three.

### Basics

**Name:** Three

**Gender:** Female

**Pronouns:** She / Her

**Age:** 25

**Birthday:** March 3rd

**Orientation:** Biromantic

**Languages:** Most languages, main being English.

**Occupation:** Traveler

### Appearance

**Hair Color:** Black with blonde streaks

**Eye Color:** Grey

**Height:** 5'5"

**Notable Features:** hair & eyes & her voice

**Style:** She likes to layer clothes a lot, even if it looks stupid. A sweater over a flannel? Check. A skirt over jeans? Check.

**Vision:** well above a humans

**Skin:** pale

**Scent:** Dust

### Personality

Three is a mess of emotions, her emotions flip flopping around abruptly. Her data was heavily corrupted upon transfer and so the file of emotions got jumbled up and her system has a hard time understanding it at all, instead glitching in and out of emotions and not having the correct response to a lot of things. She is quite self conscious of her emotion files having so many issues and over her voice box being so messed up as well. She typically keeps a soft spoken and gentle nature the longest until a glitch happens and she flies through emotions once more. Her glitches tend to make her act out in violent outbursts too.

### Trivia

- As stated above, Three also has an issue with her voice box, her voice sounding more robotic and sometimes even glitchy as compared to her siblings voice boxes being normal
- As stated above, sometimes her movements are a bit stiff and her system tells her there is an error somewhere but nobody could ever figure out the issue and assumed it was just a glitch that kept popping up and it was a glitch that they didn't think could be fixed.

## About Four.

### Basics

**Name:** Four

**Gender:** Nonbinary

**Pronouns:** They / Them

**Age:** 25

**Birthday:** March 3rd

**Orientation:** Panromantic

**Languages:** Most languages, main being English.

**Occupation:** Traveler

### Appearance

**Hair Color:** Light brown

**Eye Color:** Light brown

**Height:** 5'8"

**Notable Features:** bright smile, light freckles along the bridge of their nose.

**Style:** They typically wear both feminine and masculine clothing and have a habit of mixing the two more often than not.

**Vision:** well above a humans

**Skin:** pale

**Scent:** Dust

### Personality

Four's personality is happiness. They seem to only know happiness or their systems seem to not understand how the other emotions work and how to give a proper response with those emotions. They're clinging and so excitable over anything at all. They don't know a single thing about personal space and see everyone as a friend despite having just met someone. Despite not knowing how to display other emotions themselves, they seem to pick up on others emotions easily, even if it isn't happiness, showing that somewhere in their system, they do understand other emotions as well.

## Trivia

- They live up to the baby of the siblings and always try and get their older siblings to do anything that they want. If they want to go see what a cafe is like, they get their way. They always get their way.
- They like singing and they have a beautiful singing voice to go along with their love for singing, it's quite amazing and with their knowledge of songs, they can sing anything their machine mind desires.
