

This list is not limited to the amount of outside datasets that you can use on your project. Not all of the data are easily available, but we thought this would help you get ideas for the event in October! For questions contact: Angelica.Quirarte@GovOps.ca.gov

We started with this website: <http://greenbuildings.ca.gov/> How would you make it better? What would you add?

If you have any other data ideas- let us know!

- Recycle facility locations
- Landfill and other waste facility locations
- Temperature and geolocation data
- Ozone/emissions geolocation data
- General plan and zoning geolocation data
- Road and public transit maps
- Traffic congestion geolocation data
- Air pollution geolocation data
- Electric vehicle charging locations
- Gas station locations
- Other states' sustainability data
- Other states' fleet data
- Other states' procurement data

Here are some potential local sources that might be able to provide this data:

- City of Sacramento
- County of Sacramento
- SACOG
- Department of Transportation
- SMUD
- PG&E
