

Review Sony VPL-VW665ES 4K Projector

<https://besthometheaterprojectorblm.blogspot.com/2019/12/review-sony-vpl-vw665es-4k-projector.html>

Sony VPL-VW665ES 4K Projector was another addition to Sony's 4k home theaters when it was launched. Far better than its predecessors, VPL-VW665ES was designed to make sure any shortcomings in Sony's previous home theaters were addressed properly. The picture quality as expected by a product from Sony is absolutely stunning. Backed up with SXRD (3) technology, Reality Creation and TRILUMINOS color feature, it takes your home theater experience to new heights.

The brightness this projector offers is amazing and you will see much more improved black color performance. Overall the sharpness, color depth and picture details are excellent. Sony also provides MotionFlow option in VPL-VW665ES, which is effective to reduce blurriness and provide extra smoothness and motion wherever required.

It also addresses concerns of genuine gamers by providing low latency mode. Overall the projector provides great quality and performance to meet the expectations of many home theater lovers. Also read more about review benq w1070 projector – [Click Here](#).

Specifications Let's take a look at the specifications of the projector:

- SXRD (3) Technology
- Brightness 1800
- Contrast Ratio 300000:1
- Native Resolution 4096×2160
- 3D/Blu-ray 3D
- Native Aspect Ratio 1.85:1 (Quad HD) [Elitescreens](#)
- Lamp Life 6000 hours (eco-mode)
- Power Zoom/Focus
- Zoom Lens Ratio 2.10:1
- Weight (approx.) 31.0

For a complete list of specifications please visit; [Sony](#).

Exterior The projector is in dark tone which is always nice because it blends with dark home theater setups. Have a front-facing fan. It weighs (approx.) 31.0 with dimensions (approx.) 8.0 H x 19.5 W x 18.3 D.

Connectivity The projector offers standard LAN connectivity (RJ45). A USB port, 2 HDMI ports; HDMI input2 supports HDCP 2.2. With the label of Remote, a RS-232 serial port (DB9 connector). A MiniJack (IR IN) and a couple of 12 volt trigger (Trigger1 and Trigger2).

Visual Specs Producing more than 4 times the resolution of Full HD, the 8.8 million pixels are put to work and the results are no less than spectacular. The picture sharpness, detail and color spectrum are absolutely stunning. Picture clarity is excellent with less sharp edges. Another feature where the VPL-VW665ES excel is the brightness. The brightness works well under ambient lights as well, without compromising on color reproduction and contrast.

Unlike some of the other Sony's entry-level 4k projectors, which are without any iris function at

all, Sony VPL-VW665ES comes with Advanced Iris3 technology, which really helps with its overall black level performance. The projector can achieve up to 300,000:1 dynamic contrast, which gives you stunning picture quality and details.

Apart from providing excellent results for native 4K content, VPL-VW665ES 4K projector is backed with Reality Creation. It is a super-resolution technology that enhances your non-4k (Full-HD) content to nearly match the quality and detail of 4k content. So the projector is not just about native 4k content you can even watch non-4k content with extra depth and detail. It also helps upscaling your 3D content to 4k.

Sony also provides VPL-VW665ES 4K projector with its TRILUMINOS display technology, which greatly enhances the color range to provide more depth and detail in picture. It also has the MotionFlow option, to add more smoothness to your content. But it is not necessarily suitable for all type of audience and content. You can give it a try on sports related content, to give it some extra flow and motion.

It is HDR compatible making sure it provides more clarity and accuracy to the complete range of each images.

It also provides stunning and near native-4k experience for Blu-ray discs mastered in 4k; [Techtarget](#).

Price The Sony VPL-VW665ES 4K Projector is out of production and its current price cannot be confirmed through authentic sources. You might find third party sellers or look for used projectors.

Positives Let's discuss some of the positives of the projector:

1. Native 4k resolution with excellent picture quality.
2. Advanced SXRD panel, with improved flatness level of pixel surface; [Hometheaterreview](#).
3. The projector provides excellent brightness levels. So you don't have to worry much about ambient lights. The brightness is great for 3D content too.
4. Excellent color range and skin tone.
5. Sony VPL-VW665ES 4K Projector is backed up with Reality Creation, upscaling the picture quality of your non 4Kcontent to a new level. So you can grab some of your older content and watch it with a new visual experience.
6. Comes with the Iris3 technology. The projector can achieve up to 300,000:1 dynamic contrast.
7. MotionFlow to reduce any blurriness and provide extra smoothness and flow wherever required.
8. Easy to install in smaller home theaters. Provides lots of flexibility in terms of positioning.
9. HDR compatible; [Projectorpoint](#).
10. Low latency mode provides great experience for gamers.
11. Have a front-facing fan which is very helpful for installation, and helps in maximizing the throw distance.

Negatives Some of the negative aspects of the projector are: 1. Consist of a mercury lamp which is widely considered harmful for the environment. 2. The projector is out of production and

might short-fall of your expectations when comparing it to the current 4k projectors available in market. 3. No wireless connectivity.

Summarizing Sony VPL-VW665ES 4K Projector is certainly a great choice for home theaters. It has much more features than the entry-level 4k projectors of Sony. The image quality and sharpness is absolutely stunning backed up with additional features to take your home theater experience to a new level. It can absolutely work great for darker home theaters and under any sort of ambient light, thanks to the brilliant brightness levels the projector offers. It also provides features to help genuine gamers enjoy the 4k projector experience.

Overall performance of the projector is great and it is easy to setup for even smaller home theaters. It is out of production, but might be available through third party or you can search for used projectors on online stores. Make sure you find it under the right price as there are many budget friendly 4k projectors in the market which can outshine VPL-VW665ES. So make sure you go through the performance of each projector and what it offers comparing to its price before finalizing your decision.
