

Hi \$managerName,

I'd like to expense a subscription to [Quastor Pro](#). It's a weekly newsletter for developers that sends out technical deep dives on topics in frontend and backend dev. It's read by 40,000 engineers.

The newsletter covers things like

- **System Design Topics** (Database Replication and Sharding, Load Balancing, Caching Strategies)
- **Cloud Offerings and their Trade Offs** (DynamoDB, S3, Lambda, etc.)
- **Different Architecture Paradigms** (Event Driven, Request-Response)

And more.

It costs \$120 per year (or \$12 per month) so the value gained from the content far outweighs the cost.

Let me know if you're fine with this.

Thanks,

\$name
