

# Trey For Senate Platform

## Taxes

I support an overall decrease in taxes, along with a uniform tax rate for all citizens to ensure equality of all people no matter their race, gender, or income.

## Infrastructure

I support maintaining American infrastructure across the country. To ensure that America's infrastructure is well maintained, I would support a mild increase in infrastructure spending.

## Military

I support a significant increase in military spending in order to defend the United States domestically and internationally. This also includes the cyber domain of the military as we are behind our enemies in the cyber defense domain. Women should be allowed in the military with the same tests and requirements as men.

## Abortion

I oppose abortion in all circumstances. I believe that abortion is murder and the question should not be about the choice of the mother, but the life of the child.

## Foreign Policy

While I support an America First style of foreign policy, I believe we cannot turn a blind eye to those suffering elsewhere. Being the most powerful country in the world comes with the responsibility to stand up for those who cannot defend themselves, and who are being subjected to terrible human rights violations and violent autocratic regimes. I would support intervention in situations where these situations are proved to exist.

## Gun Rights

I fully support the 2nd amendment and opposes any attempt to take away this constitutionally guaranteed right.

## Same-Sex Marriage

I believe that marriage should be a private and/or religious ceremony and that the government should be removed from marriage. Until such time that government is removed from marriage, I support legislation to ensure that marriage is between a man and a woman.

## Welfare

I believe in a welfare system that cannot be abused. I support drug testing of welfare recipients and a criminal background check before providing welfare.

## Trade

I support trade deals that put America first and that benefit America. I oppose the President's move to withdraw us from NAFTA.

### Immigration

I support deporting *illegal* immigrants. I also supports building a wall across the border in order to minimize illegal immigration.

### Healthcare

I support the Privatization of Healthcare. The government should not be involved in Health Insurance or Healthcare as neither are a constitutional right. These should be left up to the Free Market.

### Education

I support the use of Vouchers and School Choice to remove as many students as possible from failing schools. Once enrollment at failing schools is small enough, they can be shut down and the funding and good teachers from those schools can be reallocated to better schools to turn them into world-class schools.

### Voting Laws

In order to insure total validity of elections for US government officials, I support the use of Voter ID.

### Capital Punishment

I oppose Capital Punishment, while supporting individual state's right to choose whether or not to use it. I would support an overturn on the Federal Ban on Capital Punishment.

### NASA and Space Travel

Expanding man's horizons has always been an integral part of America. Many scientific discoveries or new inventions that have changed the world have been created due to this ideal in America. We are doing ourselves a disservice to not try our hardest to expand our horizons. NASA a should be refunded to the highest extent to facilitate both manned and unmanned space travel to the moon, to Mars, and beyond.

## Eminent Domain

Eminent Domain should be curbed or outright banned as it is a violation of property rights that are among the most fundamental rights available to Americans.
