Certified Lean Six Sigma - Green Belt Certification Program

Dear {FirstName},

As a top-tier professional, there is a need to continuously **detect and analyze problems** as well as **proffer solutions using DMAIC**. The lack of this quality has caused businesses to stagnate for years.

Recently, we conducted a survey that asked managers, CEOs, and professionals about their business struggles. Some talked about how they felt stuck in their career. Others opened up to us about how their businesses weren't growing but their expenses kept piling up. I remember Jarvis saying, "My business doesn't thrive like it used to, and it hurts."

Do you find it odd that 80% of the time, business professionals get poor results? Or did you just let out a deep sigh?

{FirstName}, one of the secrets to turning this wheel is by using **lean six sigma insights** to **enhance productivity** and **optimize resources**. Therefore, we have introduced the Lean Six Sigma Green Belt Certification Program.

The Lean Six Sigma Green Belt Certification Program will help you master the concept and implementation of process optimization. This program, unlike others, goes **beyond the theoretical—focusing** on getting into **real work practices**.

We understand that it is not good enough to at least try and fail; you need to be successful. For this reason, our faculty experts will hold your hands as they provide you with the skills necessary to achieve your goals.

What You Can Expect

With successful operations in key parts of the continent, Luca Chiasserini has built a reputation in Lean Six Sigma. So, whether you're based in Asia, Europe, the Middle East, or the USA, you'll learn **proven strategies** that help you **create workable frameworks** for your business.

This program will show you how to use value stream maps to improve internal workflows and provide greater value to your customers. Through Lean and Six Sigma, you will improve operations in a systematic way, like Jericho Anderson, CEO of Bridge Firms.
At the end of this program, you will be able to develop business solutions that drive **cost savings**, **quality improvements**, and **streamlined workflows**.

Your Faculty Director

Our faculty director has completely cracked the code of Lean Six Sigma. As a course facilitator, we have invited Luca Chiasserini, an innovative Operations Manager, and Lean

Six Sigma Black Belt. He served and has extensive experience in the FMCG, banking, and automotive industries.
Lucas was previously the Head of Lean at Australia Post. He was also illustrious during his time as Head of Process Re-engineering at National Australia Bank, Asahi Schweppes Australia, and Porsche Consulting. His expertise lies in Operational Excellence, Lean Six Sigma Methodology, Agile & Human-centered Design, End-to-End Value Stream Mapping, Continuous Improvement, P&L Management, and Stakeholder Management.

Registration:

Are you ready to increase sales and reduce expenses? Join us to master the Lean Six Sigma tools and concepts so you can immediately apply them in your workplace.

Register to get **lifetime access** to this high-quality self-paced program. For mass participation and certification, contact us to customize a learning program that fits your organization's needs.
