

Edible Sugar Scrub Badge

About:

In this badge you will make edible sugar scrub.

Materials:

- "2 cups of brown sugar
- 1 cup of solid (but soft) coconut oil
- Extra additions (vanilla extract or essential oils) if you want
- Food processor (optional)
- Airtight container or mason jar"

Instructions:

1. Whip together the sugar, coconut oil, and any extra additions of your choice. You can use a food processor if you wish, but it is not necessary.
 - a. If using a food processor don't let it process too long or the coconut oil will melt and the mixture will separate. If this happens just toss the mixture into the freezer to solidify and mix again.
2. You will mix the ingredients together until the mixture looks creamy and resembles loose cookie dough.
3. Store in an airtight container. This sugar scrub can last for weeks and even months.
 - a. If the mixture does separate just stir it around with your finger before using.
4. ENJOY!!

Brown sugar

Coconut oil

Food processing

Add other extracts if desired

Final product

Point Scale

Description	Points
-------------	--------

Make the sugar scrub and personalize it and put it in a jar	4
Make the sugar scrub, but not follow the instructions and mess up the recipe (ie. separating mixture)	3
Final Product is incomplete	2
Not make the sugar scrub	1
