

Now I'm a feudal lord have a lot of money, lands, etc... Before the crusade I was a knight and just have a little money to feed my family. I choose to join the crusade because I want to let my child go to school and let them have a place to live now I have all of that.

But after I decided to join the crusade, I had many crazy ideas in my mind because this is a war, I can be killed by other people and it takes two years to get to the Jerusalem. I needed to take all the danger and the difficulties to survive; I'm very worried about the weather, food, disease, etc... But if I stay at Europe I still get disease and the money don't have enough for my family and I have more experiences about fighting, I can protect my family and me. I know a man and he was a knight to he went to the crusade. He was got lost by sandstorm and the desert his family cried a lot. My best friend, who got a disease and his nose bleeding, and his skin had red things and make him itchy he can take it anymore he killed himself by stab the sword in his stomach. One time the crusade ran out of food and we need to kill a horse and eat it day by day and we took the horse blood to drink and when I'm drink the horse blood it feel salty.

I really killed a lot of people but after all I just a knight killing people to survived and protect other is my job, I still feel sorrow for the people that I killed but if I want to get rich I need to take all the difficulties. When I killed people the blood of them thrown over my body and face. When we entered Jerusalem we camp for one night then I hide my family in a cave, after that we ready to battle and the Muslim too, we ran to each other and took our sword and started to chop the Muslim, blood was over the place head been cut of arms and leg too. I lost my hand and it is very hurt, I tore my shirt out then I wrap up to the injuries part. After the battle my army was win but the people die a lot then all the people survived that include me finding woman and kids and after that I don't know anything, then we found the commander and chop of his head. Then I took my family out then we just took a house and live. The army gave me a lot of money then I start my career.

My child went to a very good school then they are a politic I and my wife live happy day after day and that is my entire story.
