

Materials Needed for 2nd Grade Unit:

PDF for Water Cycle Flipbook- contact Mrs. Mabalay on Facebook, @MrsMabalay.Education

CER worksheet - Water: Claim, Evidence, Reason

Materials Needed for 3rd Grade Unit:

Visual Vocabulary Cards with Pictures:

1. **Watershed:** A watershed is an area of land where all the rain and water flow to the same place, like a river or lake. Imagine a giant bowl where all the water goes to the center.
 2. **Main Stem:** The main stem is the biggest part of a river or stream. It's like the main road in a city where water flows the most.
 3. **Primary Tributary:** A primary tributary is a smaller stream or river that flows into the main stem of a bigger river. It's like a small creek that joins a bigger river.
 4. **Secondary Tributary:** A secondary tributary is an even smaller stream or river that flows into a primary tributary. It's like a tiny creek that flows into a small river.
 5. **Ecosystem:** An ecosystem is all the living things (like plants, animals, and bugs) and their home (like a forest or ocean). Everything works together to make the ecosystem healthy.
 6. **Maidu Territory:** Maidu territory refers to the land that was originally home to the Maidu people. They lived in parts of California and had their own special ways of living with nature.
- **Pictures of various local watersheds**
 - **Water on the Move Activity worksheet from Project Wet**
 - Plastic trays (15)
 - Tin Foil
 - Plastic cups (30)
 - Blue food coloring
 - Water (1 gallon)
 - **Google Earth or maps of local waterways** (Big Chico Creek and Feather River)
 - **Art supplies**
 - White printer paper
 - Colored pencils (15 packs)
 - **Notice/Wonder Chart** (chart paper or whiteboard)
 - Markers or Whiteboard pens
