

Participant Guide – Dynalene Safety Course

Activity 1

Personal Protective Equipment (PPE) :

What is your role? _____

What PPE do you always need to wear? _____

What PPE do you only wear sometimes and why/when would you wear it?

Matching :

Draw a line to match the GHS Pictogram with its meaning:

Pressurized Gas

Oxidizers

Health Hazard

Corrosive

Irritant

Activity 2

Scenarios:

1. A production team member is making a batch of fluid in the production building. They have the tote on the scale and while they are adding fluid, they notice a leak due to a hole in the tote. What steps should they take?

2. While washing a beaker in the lab sink, your gloves are slippery, you drop the beaker, and it shatters. What should you do next?

3. An equipment production team member is using the miter saw in the equipment building. The saw causes the material to kick back. What proper precautions should the team member have taken to prevent injury if this occurs?
