ABSTRACT
All articles should be accompanied by an abstract between 150-300 words in 11 pt, single space. The abstract should be clear, concise, and descriptive. This abstract should provide a brief introduction to the problem, objective of the paper, followed by a statement regarding the methodology and a brief summary of results.

KEYWORDS: please mention at least three keywords that describe the manuscript.

I. INTRODUCTION

The introduction describes the background of the article discussed as a whole. The introduction should be written clearly and succinctly, comprising: (a) an adequate background and significance of your paper; (b) concise previous studies related to the title; (c) the main limitation of the previous studies and what you hope to achieve (to solve the limitation); (d) the scientific merit or novelties of your paper; (e) the aim of the study; (f) structure of the article or research questions.

Please note that all writings should be in the paragraph format; this journal discourages the author(s) from writing point per point in the numbering format. The manuscript written uses california FB font type, 12 pt font size, 1.15 pt space with a length of 5,000-10,000 words (including footnotes).

II. METHODOLOGY

This part should provide a statement about the research methodology. It includes the approaches used in the research and how the author obtained the data. This methodology should give an idea to the reader through the techniques used.

III. DISCUSSION I

This section is the most important section of your article. The analysis or results of the research should be clear and concise. The results should summarize (scientific) findings rather than providing data in great detail. Please highlight the differences between your results or findings and the previous publications by other researchers.

Heading in the discussion section should be consistently written with the structure of the article in the introduction. Headings in this discussion use Roman letters (I., II., III., etc.; you can add more than one part of the discussion, it depends on your structure of the discussion you want to write).

A. Second-Level Heading in Italics (Sub-discussion) (if any)

Following the main headings, sub-heading is provided in the manuscript. The journal allows the authors to use third-level heading (sub-sub headings), which should be numbered in A., B., C., etc.

1. Third-level heading (if any)

Following main headings and sub-heading, the journal allows the authors to use third-level heading (sub-sub headings), which should be numbered in 1., 2., 3., etc.

IV. DISCUSSION II

This section is the most important section of your article. The analysis or results of the research should be clear and concise. The results should summarize (scientific) findings rather than providing data in great detail. Please highlight the differences between your results or findings and the previous publications by other researchers.

Heading in the discussion section should be consistently written with the structure of the article in the introduction. Headings in this discussion use Roman letters (I., II., III., etc.; you can add more than one part of the discussion, it depends on your structure of the discussion you want to write).

V. CONCLUSION

The conclusion should be written concisely between 1-2 paragraphs only. It should answer the objectives of the research. Please provide a clear and concise conclusion. Do not repeat the abstract or simply describe the results of the research. Give a clear explanation regarding the possible application and/or suggestions related to the research findings.

ACKNOWLEDGMENTS

The author(s) may recognize those who helped in the research, especially funding supporters of your research. Include individuals who have assisted you in your study: Advisors, Financial supporters, or may other supporters i.e.,

REFERENCES

The total of references is suggested at least 30 sources with at least 80% from the journal resources. The authors must refer to the most recent Chicago Style footnotes and bibliography. Authors are highly encouraged to use a citation manager software, such as: Mendeley, Zotero, and Endnote, in order to generate citations and bibliography.

It must be noted that, for citation and bibliography purposes, names, titles, publishers, institution names must be retained in their original and official language. There is no need to translate English names/titles/institutions into Bahasa Indonesia or vice versa or from/into any language.

It must also be noted that the sequence of examples given below do not imply the order of which to classify the literature in the bibliography. No classification or categorization of literature is needed, rather they should all just be ordered alphabetically.
