ChatFoldr Privacy Policy

Last updated: April 2026

> **Summary:** ChatFoldr does not collect, store, or transmit any of your personal data. All extension data is stored locally on your device.

What is ChatFoldr?

ChatFoldr is a browser extension that helps users organize their AI chat conversations into folders. It adds a sidebar to supported AI chat websites for folder management, search, and bookmarks.

Data We Do NOT Collect

We want to be completely transparent. ChatFoldr does not collect any of the following:

- Your chat messages or conversation content
- Your personal information (name, email, address)
- Your browsing history
- Your authentication or login credentials
- Your location data
- Any financial or payment information
- Any health or personal data

Data Stored Locally

ChatFoldr stores the following data locally on your device only using Chrome's built-in storage API:

- **Folder structure:** Names, emoji icons, and colors of folders you create
- **Chat-folder mapping:** Which conversations belong to which folders (using page-generated IDs only, not conversation content)
- **Bookmarks:** IDs and titles of conversations you bookmark

This data never leaves your browser. It is not transmitted to any server, cloud service, or third party.

Website Access

ChatFoldr requires access to specific AI chat websites solely to inject the sidebar interface and read conversation titles displayed on the page. The extension:

- Only reads conversation titles visible in the page sidebar
- Does not read or access conversation message content
- Does not modify your conversations
- Does not interact with any website APIs on your behalf

Third-Party Services

ChatFoldr does not use any third-party analytics, tracking, advertising, or data collection services. No data is shared with any third party.

Remote Code

ChatFoldr does not load or execute any remote code. All extension code is bundled within the extension package and reviewed by the Chrome Web Store.

Data Deletion

Since all data is stored locally, you can delete it at any time by:

- Uninstalling the extension (automatically removes all stored data)
- Clearing extension storage in Chrome settings

Children’s Privacy

ChatFoldr is not directed at children under 13 years of age. We do not knowingly collect any information from children.

Changes to This Policy

If we make changes to this privacy policy, the updated version will be posted on this page with a new date.
