

玉再廈之書沉思語錄

A Thought to Ponder from The Urantia Book

Straight Back

“Science is a quantitative experience, religion a qualitative experience, as regards man’s life on earth. Science deals with phenomena; religion, with origins, values, and goals. To assign causes as an explanation of physical phenomena is to confess ignorance of ultimates and in the end only leads the scientist straight back to the first great cause—the Universal Father of Paradise.”

195:6.5 (2077.1)

直接回歸

「就人類在地球上的生活而言，科學是定量的經驗，宗教是定性的體驗。科學論述現象；而宗教，涉及起源、價值和目標。用原因來解釋物理現象就是承認自己對終極目標的無知，最終只會讓科學家直接回歸偉大的第一起因——天堂萬有之父。」
