

Cakewalk Sonar and related products

Presets

- [Alesion Arp Presets](#) - a collection of ARP files originally created by Tom Bockway (user **b rock** on the old forum). To install in CbB, unzip into the "Cakewalk Content" "Cakewalk Core\Arpeggiator Patterns" folder.
- [Lucky Man](#) - a Rapture prog created by Francesco Silvestri. Originally linked in this thread <http://forum.cakewalk.com/FindPost/2755715>. Uploaded here because the original download link is now bad. For Rapture add this prog file somewhere in "C:\ProgramData\Cakewalk\Rapture\Programs" then press F5 in the Rapture program browser. For Rapture Session/Pro add the prog file to "Cakewalk Content\Rapture Pro\Programs."
- [Sitala Clean 808](#) - a drum map for the default [Sitala](#) 808 kit built for <https://discuss.cakewalk.com/index.php?/topic/14579-cant-load-some-plugins-solved/#comment-123914>. Add to your drum map folder.
- [Sitala Multi-Output Track Template](#) - made using the Sitala Clean 808 drum map above, this track template contains a folder with a MIDI track and a separate audio track for each of the Sitala pads mixed down to a single audio track at the bottom of the folder. Add the drum map to your drum map folder and the track template to your track template folder. Then insert the template into your project.

FX Chains

- [HP-LP Filter](#)
- [XR Series EQ](#) - these three
- [XR-V Series](#) - FX chains written for
- [XR800F](#) - this thread <http://forum.cakewalk.com/FindPost/3270849>
- [VCV Bridge](#)

How To

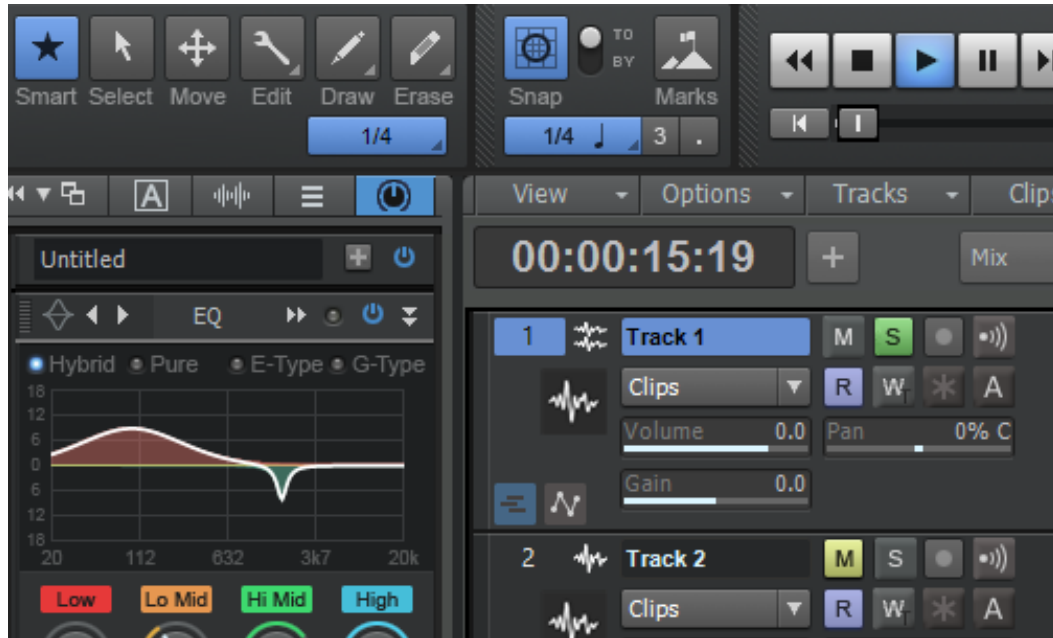

[Stop transport and go back two measures](#) - CAL script example written for this thread <http://forum.cakewalk.com/FindPost/3272256>

Instrument Definitions

- [AD2 Standard](#) - created from the Addictive Drums 2 keymap pdf and documented CC info.
- [BreakTweaker](#) - about as basic a plug-in instrument definition gets
- [HPD15](#) - a cleaned up version of this instrument definition file for this thread <http://forum.cakewalk.com/FindPost/3414791>
- [SD3 Default](#) - the default map displayed in Superior Drummer 3
- [SI-Drums](#) - created from the SI-Drum Kit help

Themes

[Tuncury](#) - an alloy of tungsten and mercury **Updated 2021 Dec 11**

[Tuncury Light Green](#) - a Tungsten-based theme with a light PRV background and light green accents Updated 2021 Dec 11

[Mercury Light Green](#) - a Mercury-based theme with light green accents Updated 2021 Dec 11

Dark Theme Images for PC Modules

[PC-2A](#)

[CA-2A](#)

[Concrete Limiter](#)

[PC4K Expander/Gate](#)

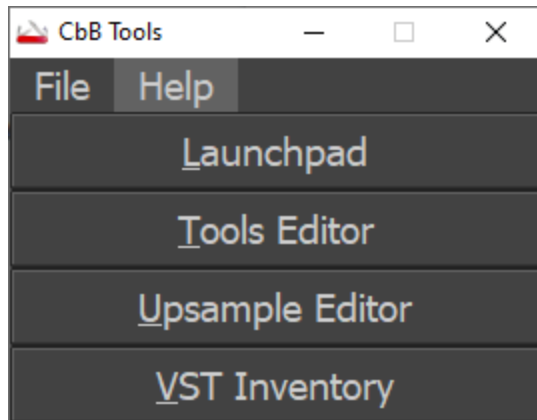

[PC4K S-Type Channel Compressor](#)

Utilities

[CbB Tools](#) - a collection of utilities for Cakewalk Sonar. Version 2 includes complete rewrites of Cakewalk Launchpad, Plug-in Upsample Editor, Tools Editor and VST Inventory. Also supports

Cakewalk by BandLab, SONAR X-Series Producer and SONAR Platinum. Current version 2.0.10. Updated 2023 Mar 06

A screenshot of the 'Cakewalk Launchpad' window. The title bar shows 'Cakewalk Launchpad 2021.04 - 27.4.0.47*'. The menu bar includes 'File', 'Snapshot', 'Cakewalk by BandLab', 'Source', 'Favorites', 'Save', 'Reset', and 'Help'. The main area is a table with columns: Project, Creation Date, Modified Date, Size, and Path.

Project	Creation Date	Modified Date	Size	Path

A screenshot of the 'Tools Editor' window. The title bar shows 'Tools Editor'. The menu bar includes 'File', 'Submit', 'Delete', 'Reset', and 'Help'. The main area contains several sections: 'Update Registry' with a 'Yes' dropdown, 'Show Defaults' with a 'Yes' dropdown, 'Edit' with a dropdown, 'Required Entries' with fields for 'Name' (SoundForge), 'Type' (WaveEditor), 'Exe Path' (C:/Program Files/SOUND FORGE/SOUND FORGE Pro 12.0/Forge120.exe), and 'Menu Text' (&Sound Forge). Below this is 'Optional Entries' with fields for 'Status Bar Text', 'Modal' (Do not set), 'Cmd Args', 'Current Directory', 'Help File Path', 'Help File Topic', 'Args', 'Short Filename' (Do not set), and 'Region Flag' (Do not set).
