Patience and Hope in Adversity

My name is Shahazan, I am a seamstress who was trained under Rohingya Children's Projects (RCP).

When we arrived here at the Bangladesh camps in 2017, my family and I were completely helpless. There wasn't a single one of us that could support the entire family financially.

Alhamdulillah (praise be to God), my family and I were blessed after our arrival in Bangladesh. The RCP stood beside me and my family in our helpless state. They taught me how to handle life and how to achieve success despite all the adversity.

They trained me in sewing and gave me my own machine. I saw it as something to decorate life with as well as something that would make my family's life easier. Alhamdulillah, the contributions of RCP are really incredible.
