

Damage values indicated assume that your ender was 4C>214B where applicable. Any combos with optional attacks will have the damage assuming you used the optional attack and are marked with parenthesis. Due to distance proration, you may have different damage numbers than noted here, such as (Corner) 5B>214A~4B starter, it depends on how far you are from the opponent. CH = Counter Hit, dl = delay. The 623A>5A/2A>3B/5C>J. 2C>J 214B>66C/2C extension would become redundant and fill up the document with way too many slight variants, therefore, all the variants have been noted in blue **PRIORITY** in the 5A section only, with only one of these noted for the rest of the starters, just remember that you can go for any of these variants off this extension. Combos marked with **PRIORITY** should be focused on first and known well as they are the most useful and likely to be used.

Combos compiled by FrozenCore and credit to most of these routes goes to Nishine, Ryuu, and Wakutsu. Credit also goes to Psykotik, Suna, Exzelsios, GomenNasai, Geinonen, Pffhor and SHABAMsicle.

CVO Combos:

* Notes: In CVO, you can press ABC to perform an IW, however you can also input IW normally if you prefer. If your CVO point was an attack involving Thanatos such as 214B or the 4A followup, you cannot do 22C right after CVO due to Thanatos cooldown, therefore, it is recommended to use 623B as the CVO point for the majority of CVO routes.
