

2020 GA4GH Connect Virtual Meeting

Documentation Tooling Breakout Agenda

Details subject to change.

Meeting Goals: Cloud developed OpenAPI 3 to html documentation builder can be used by other workstreams

Relevant Work Streams: TASC, Cloud, GKS, LSG

Chairs: James Eddy, Andy Yates

Notetaker:

Thursday, March 26, 2020

Start Time	Discussion Topic	Related Materials	Speakers
00:00	Welcome & introduction	Slide deck	James Eddy
00:05	Auto-generated docs and UI for Swagger/OpenAPI standards	TASC issue summary	James Eddy
00:15	Other documentation tooling (e.g., user guides, developer docs)	Rnaget compliance Refget compliance Refget cave	Andy Yates
00:30	Other “build” tooling (e.g., reference implementations)		All/discussion
00:00			
00:00			

DY: Which standards to apply first?

- JE: WES, we have a PR from Susheel wiht the update

- DY: Will get a look at this from TRS

-AY: Service Info is a small API, might be a good candidate.

- refget API could use this, want to prevent OpenAPI / Textual representation

Melissa C: Example Python notebook, code was majorly helpful

James B: We are looking of compliance tests for file formats. Allows software to be supported

AY: Torture test?

- JB: Some of this is how to interpret this. Making it computable is an .

Jordi R: Beacon uses ELIXIR Beacon as basis for reference implementation
