

Gummy 1.0.X New Features

Part uno

Team Gummy is proud to introduce the Gummy 1.0.X series of ROMS.. Here you will find an overview of new options offered in the latest release.

If you are a developer from another team and want to include our features or addons you must get approval and give proper credit before doing so

4.0.4 - credit Google:

Gummy is now based on Android 4.0.4 - this was a lot of work but well worth it as you should see a nice boost in overall performance..

Apex Launcher - credit [Android Does](#):

With the direct approval of the developer (the same developer who makes the fantastic “[Fancy Widgets](#)”)

Gummy has updated to the 1.0.5 release of Apex Launcher

v1.0.5 (Apr 4, 2012)

- Merged changes from Android 4.0.4
- Fixed force close after reboot
- Fixed transparent drawer bug
- Other minor bugfixes

v1.0.4 (Mar 30, 2012)

- Fixed force close when loading drawer
- Fixed icon size issue on tablets

v1.0.3 (Mar 29, 2012)

- Minor bug fixes and updated translations

v1.0.3beta1 (Mar 19, 2012)

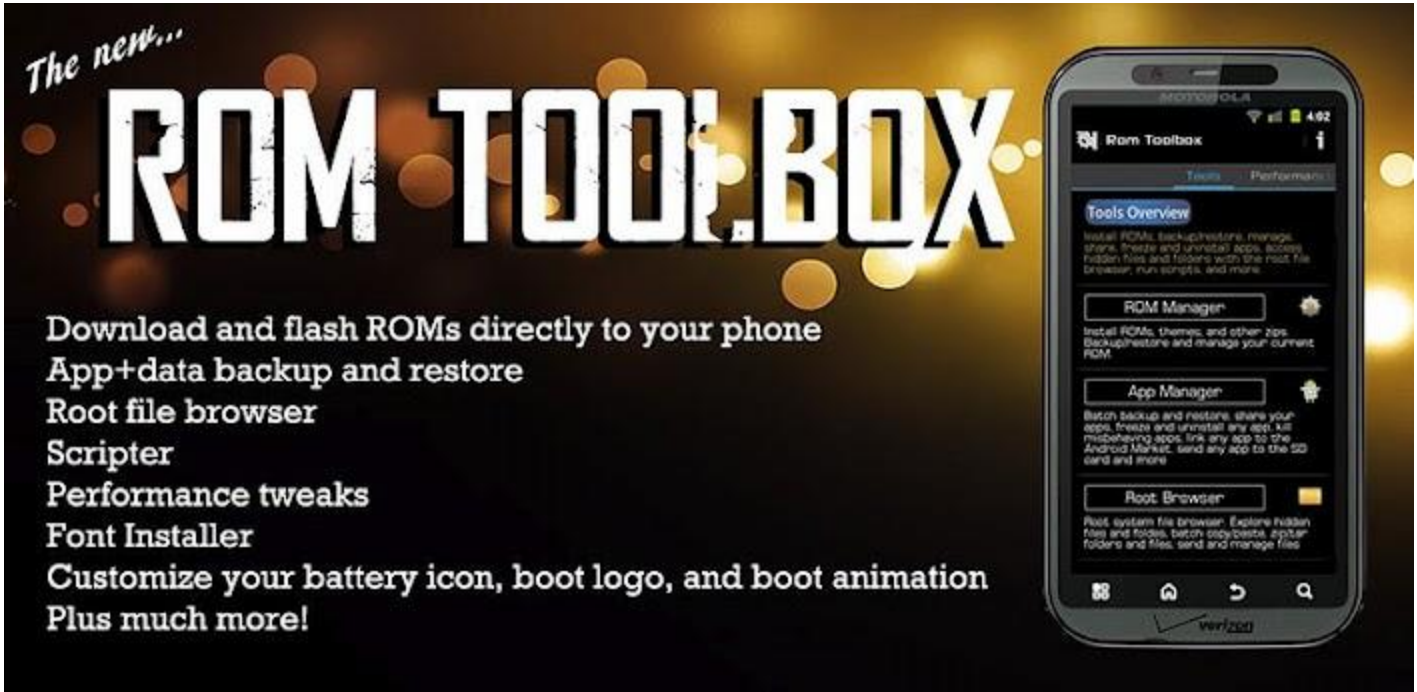

- New infinite scrolling option (bounce)
- Added option to check for updates now
- Added changelog in new version notification
- Added cube (inside) transition effect
- Improved homescreen/drawer/dock transition effects
- Improved preview/drawer animations
- Fixed a widget resize bug
- Fixed bug with removing icons from folders
- Fixed drawer app listing bug when sorting by mostly used
- Other minor bug fixes
- Updated translations

v1.0.2 (Mar 12, 2012)

- Improved swipe gestures
- Updated translations

Please visit [the release page over at XDA](#) for details

Rom ToolBox - credit Jrummy16:

Gummy 1.0 includes the free version of TeamGummy team member Jrummy16's awesome ROM Toolbox.. Jrummy has been nice enough to unlock a few thing specifically for Gummy :D

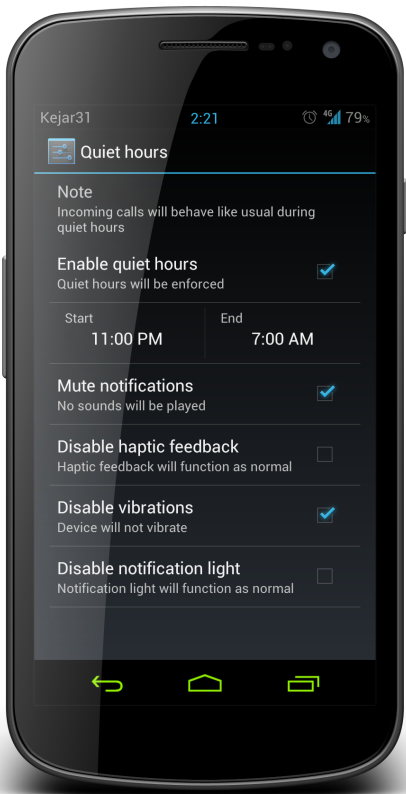

For a list of the awesome tools and applications included with this, [see the application on the market](#)

Root Browser - credit Jrummy16

Again Jrummy has come through for his teammates by providing a free copy (yet fully unlocked) version of Root Browser.. With Gummy you will no longer need to rely on third party apps to take care of file management :D

Quiet Hours - credit CM:

Tired of email notifications waking you up in the middle of the night? Especially if you are like me and use your phone as an alarm.. Well thanks to the great work from Cyanogenmod. We are now able to assure you that annoyance will not bother you again :)

To get to these setting simply go into Sound Settings from the main settings mene

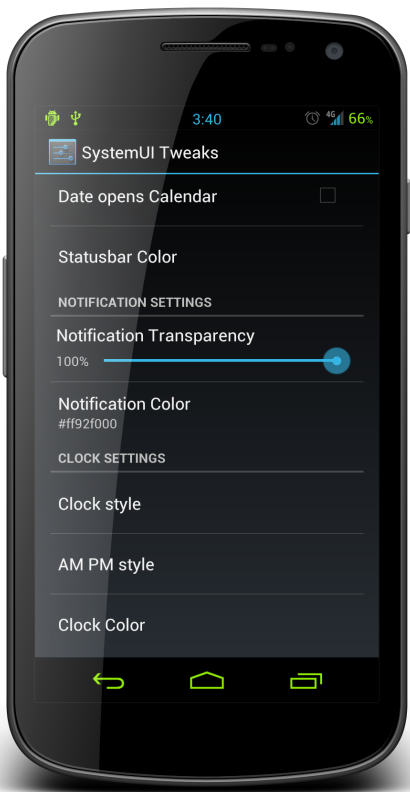

Boot Animation Sound- credit Team Bamf:

Now included with Gummy is Boot animation sounds.. If you would like to create your own the file can be found “using Root Browser ;)” in /system/media/boot_audio.mp3... So change it to what you want the only prerequisite is that it must be an mp3 and must be renamed to that file name :)

Oh if you find the boot sound annoying just turn it off in Gummy settings under General Settings :)

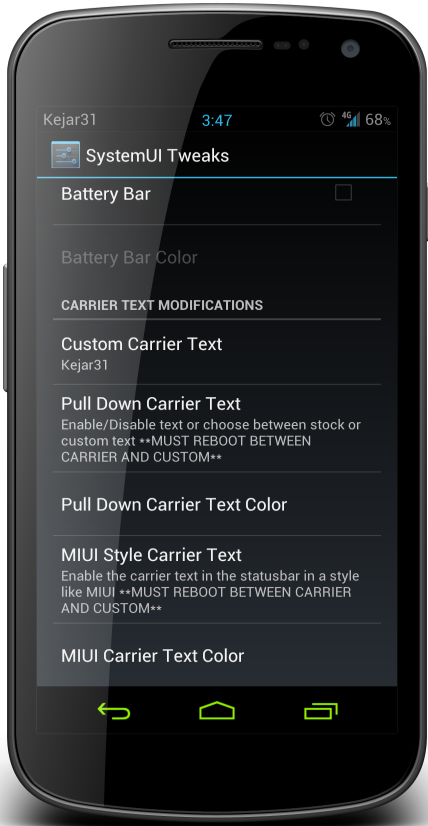

Notifications Icon color changer:

Along with the other many cool custom theming options Gummy now includes the option to change the color of your notifications icons.. (uber kool)

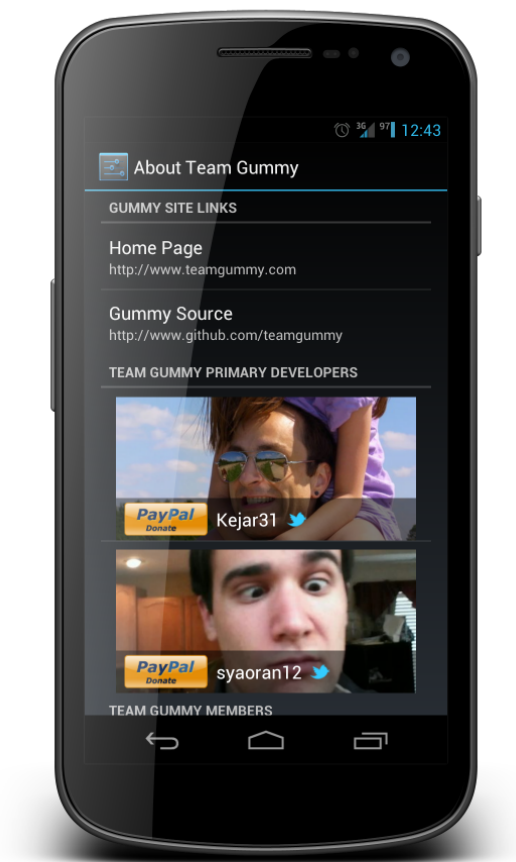

Miui style carrier text in the status bar left corner:

Not only can you set it to show your carrier text but you can even set it to show your custom carrier text to :)

About Gummy:

Gummy now includes a new About Screen you can find links to our home page and the team member's twitter accounts. Last primary dev's.. Not to sound as though we creating Gummy take a lot of time. keep our quick pace forward in work donate as it very much helps the devices.

within Gummy Settings. Within this section our source code.. You can also find links to but not least you can find donate links for the are complaining (as we do this for fun) but Getting a donation is great motivation to development. So please if you enjoy our project grow in features and expand to new
